FACULTY OF MEDICINE
ENGLISH MEDICINE PROGRAM
2023-2024 EDUCATION GUIDE

Address: Gaziantep University Faculty of Medicine Dean's Office, University Boulevard P.K. 27310
Şehitkamil / Gaziantep, TURKEY **Phone:** (+90 342) 360 07 53 (Office of Dean)
Phone: (+90 342) 360 09 98 (Student Affairs) **Fax:** (0342) 360 16 17 **Extension:** 4600
E-Mail: tipfaksek@gantep.edu.tr
Web Site: <http://tip.gantep.edu.tr/>

GENERAL INFORMATION OF THE FACULTY

- **NAME OF THE UNIVERSITY:** GAZIANTEP UNIVERSITY
- **NAME OF THE FACULTY:** FACULTY OF MEDICINE
- **DEAN'S NAME:** PROF. DR. ŞEVKİ HAKAN EREN
- **FACULTY FOUNDATION DATE:** 1987
- **FIRST GRADUATE DATE:** 1994

THE AIMS AND GOALS OF OUR FACULTY

The aims of Gaziantep University Faculty of Medicine:

1. Train physicians with the following characteristics;
 - a. Committed to human values and medical ethics,
 - b. Have adequate skills in diagnosis and treatment,
 - c. Know the health problems of the country and the region,
 - d. Know the ways to reach the right information,
 - e. Produce evidence-based information and question the information obtained,
 - f. Understand the necessity of lifelong learning and constantly renewing oneself,
 - g. Conduct useful research on behalf of public health and science,
2. Carry out high-quality and international scientific research aiming to enlighten the unknowns about the cause, diagnosis and treatment of health problems and to provide the necessary opportunities for these researches.
3. Provide the highest quality health service in the light of contemporary and evidence-based information and using up-to-date technologies.

GOALS

As Gaziantep University Faculty of Medicine, our goal is to be an institution that trains qualified physicians, can carry out high-level scientific research with usable results, is a leader in all fields of medicine throughout the country, has a voice at the national and international level and can be preferred, and that can provide high-quality health education and service by using up-to-date information and technologies.

RESEARCH OBJECTIVES OF OUR FACULTY

1. Support qualified studies by increasing scientific research opportunities and resources,
2. Increase the number of publications published in internationally proven journals,
3. Produce universal projects for the points waiting to be solved in every field of medical science,
4. Encourage and supporting projects aiming to put scientific research at the service of society,
5. Transform research activities into products through university-industry cooperation with the "Teknokent" in our university and thus contributing to the economy of the region and the country.
6. Our faculty is ranked 10th in the University Ranking by Academic Performance (URAP). Another research objective of our faculty is to rise to higher ranks by furthering its scientific activities.

SERVICE OBJECTIVES OF OUR FACULTY

The main objective of the Gaziantep University Faculty of Medicine is education and research. In addition to these activities, qualified health services are provided at the Faculty of Medicine Şahinbey Training and Research Hospital and the Oncology Hospital. With this health service, the students of the Faculty of Medicine are offered the opportunity to communicate with the patient and gain various skills, and it is ensured that the speciality students complete their education. As Şahinbey Training and Research Hospital, necessary preparations are made to apply for the national and international quality certificate.

AIMS AND GOALS OF OUR EDUCATION PROGRAM

The current education program of Gaziantep University Faculty of Medicine aims to train physicians who;

1. Communicate with the patient by observing medical ethics and patient rights,
2. Investigate and question,
3. Have the ability to make the differential diagnosis and to discuss interactively with friends and faculty members.
4. Can work as a team,
5. Can adopt and implement preventive medicine and lead by using health data appropriately in matters concerning public health,
6. Can reach the right result by using appropriate methods in the light of evidence-based and up-to-date information in the diagnosis and treatment of patients during primary health care,
7. Have the knowledge and skills in approaching forensic cases,
8. Know the health problems of our country and region,
9. Are environmentally sensitive and social.

OBJECTIVES OF OUR EDUCATION PROGRAM

To achieve the above-mentioned objectives, the objectives of our current education program are stated below:

1. Ensure that the medical students acquire the behaviours via which they can approach patients, colleagues and other healthcare professionals in a deontological and ethical framework,
2. Gain the ability to use patient communication, physical examination and examination components as a whole in the most appropriate way while examining the patient,
3. Gain the knowledge and skills to continue the primary care medical practices in the best way,
4. Gain skills in continuing education.

The aims and objectives of the education program are defined as follows, taking into account the knowledge, skills and attitudes that the graduates of our faculty are expected to acquire:

KNOWLEDGE

1. The graduates have a good grasp of medical ethics and carry out all their practices within an ethical framework,
2. The graduates synthesize the information obtained from basic medical sciences and use it when necessary,
3. The graduates explain the formation mechanism and pathophysiology of diseases,
4. The graduates recognize the diseases that are common in society and that are important in terms of their consequences,
5. The graduates can diagnose diseases related to primary care with appropriate tests and treat these diseases in the light of current and accurate information,
6. The graduates pre-diagnose patients who apply to primary care and need further examination and treatment and can refer them to appropriate centers,
7. The graduates make the first intervention of diseases that require emergency action and direct them to higher centers under appropriate conditions,
8. The graduates will be able to plan and perform corrective actions for issues concerning public health.

SKILL

1. The graduates can take quick, detailed and accurate anamnesis,
2. The graduates can perform a complete and reliable physical examination,
3. The graduates can use radiology and laboratory tests most accurately while diagnosing diseases in primary health care centers,
4. The graduates know the indications of radiology and laboratory diagnostic tools in high-level health centers well and can refer patients when these diagnostic tools are required,
5. The graduates can manage basic interventions such as bloodletting, vascular access, injection, lumbar puncture, urinary catheterization and incision suturing,
6. The graduates can apply basic life support when necessary in emergencies.

ATTITUDE

1. The graduates can communicate with the patient in the best way,
2. The graduates approach the patient with empathy and provide health services to patients without any discrimination,
3. The graduates respect patient rights,
4. The graduates evaluate the information obtained during the diagnosis and treatment stages within the framework of the confidentiality principle,
5. The graduates inform the patient sufficiently before the drug treatment and interventions to be applied, and obtain the patient's consent,
6. The graduates approach all patients accordingly by adopting medical ethics,
7. The graduates constantly renew themselves by embracing the importance of lifelong learning.

COMMUNICATION SKILLS MODULE

Aim: Explain the importance and components of basic communication skills. Define the physician's duties, powers and responsibilities.

•Goal:

- Comprehend the importance of communication in daily life and medicine,
- Define the communication problems encountered and offer solutions,
- Evaluate the physician's duties, authorities and responsibilities from the communication perspective,

BASIC LIFE SUPPORT MODULE

Aim: Understand the importance of basic life support, explain what needs to be done in some common emergencies.

Goal:

- Comprehend the importance of basic life support,
- Explain the steps of the first intervention in the patient who comes with bleeding,
- Explain the steps of first intervention in animal bites,
- Explain the steps of first intervention in burns, poisoning and apnoea,
- Communicate with the health center in emergencies,
- Recognize the patient with arrest and perform resuscitation on the model,

SCIENCE MODULE

Aim: Comprehend the importance and steps of scientific research.

Goal:

- Comprehend the importance of scientific research,
- Define and establish the scientific hypothesis,
- Conduct literature research from different sources,
- Count the steps of scientific research,
- Prepare scientific presentations,

MEDICAL INFORMATICS MODULE

Aim: Increase technical and informatics achievements.

Goal:

- Develop computer literacy,
- Comprehend the use of informatics in professional fields,
- Gain awareness about the importance of following the developing technology

GOOD MEDICAL PRACTICE - SEMESTER I

Aim: Introduce the relations of medicine with some different disciplines and to raise awareness on the subject. Acquire the basic responsibilities of medical identities.

Goal:

- Raise awareness on certain issues that will contribute to the professional development,
- Gain knowledge and attitude that will introduce the medical process and contribute to personal development,
- Know issues such as ethics, respect for life, social responsibilities related to the identity of a physician,

GOOD MEDICAL PRACTICE - SEMESTER III

Aim: Have information about the operation of the hospital and different clinics for internships. Gain basic skills about basic sampling and practices in these clinics.

Goal:

- Acquire the basic skills of different departments (taking sample, inserting a probe, IUD application, etc.) before the internship,
- Explain the functioning of different clinics,
- Gain the basic concepts of the physician-patient interview, patient information, difficult patient interview and bad news reporting

CLINICAL ORIENTATION PROGRAM

Aim: Meet the clinic in the early period.

Goal:

- Have information about the functioning of different clinics,
- Comprehend the general operation of the hospital,
- See instances from applications made in different clinics,
- Increase and develop their professional motivation,

GAZIANTEP UNIVERSITY FACULTY OF MEDICINE TURKISH AND ENGLISH MEDICAL PROGRAMS (2023-2024)

* The Clinic Tour program will be held every month on the relevant date between 15:30-17:15 with the faculty member of the relevant department.

Aims: At the end of this semester, students will be able to gain the purpose of medical education, learning methods and scientific thinking systematics. They will be able to describe the transition from non-living to living, from macro systems in nature to microsystems in living things. They will begin to identify the human body from the whole to detail, they will be able to explain the definition of movement, its formation, its components, and they will be able to describe the blood as an organ.

Learning Objectives:

1. Students will be able to start learning the history of medicine and the sociological development of medicine,
2. Students will be able to count the concepts of health, disease, preventive and curative medicine,
3. Students will be able to describe research methods, the methodology of developing hypothesis and determining the accuracy or fallacy of the developed hypothesis,
4. Students will be able to define the process of transition from non-living to living.
5. Students will be able to explain the similarities and relationships between macro systems in nature and microsystems in living things.
6. Students will comprehend the importance of evolution in the medical education process.
7. Students will be able to describe the structure and functioning of the human body as a whole.
8. Students will be able to explain the relations of muscle, skeleton, nervous and blood systems in the organ and tissue axis.

Labor and Solidarity Day: 01 May 2024

INTRODUCTION TO MEDICAL SCIENCE AIM AND LEARNING OBJECTIVES

Aim:

At the end of the six weeks committee, semester I students should be able to state the purpose of the medical faculty and medical education, the stages of development of the physician, the ethical values, the basic concepts of biophysics biostatistics and microbiology, the building blocks of life, the stages of transition to life, and basic medical terminology.

Learning Objectives:

At the end of this committee, students should be able to,

1. Explain the history of medicine and sociological development of medicine,
2. Define the concepts of health, disease, preventive and therapeutic medicine,
3. Meet learning methods in medicine and sciences,
4. Count the foundation stones of the structure and vitality of the universe,
5. Count hypotheses and theories about transition to life,
6. Explain the relationship between carbon chemistry and organic groups,
7. State the differences between biochemistry and organic chemistry,
8. Define the structure and function of organic compounds,
9. State the acid-base and pH concepts,
10. Define the solutions,
11. Explain the bioenergetic events occurring in the cell,
12. Explain the chemistry of biomolecules and identify the differences,
13. Explain water metabolism,
14. Understand the structure and the function of the chromosome and the DNA molecule and how the genetic information is passed through the DNA from one generation to another.
15. Understand and describe the structure of the basic components of the prokaryotic and eukaryotic cells, especially macromolecules, membranes, and organelles.
16. Understand the cell membrane structure and function, what are the important molecules in the cell membrane, and how the cell membrane controls movements of the substances in and out of cells and organelles.
17. Understand the structure and function extracellular matrix that surrounds the cells, the different types of cell adhesion, and how the cells communicate with their micro-environment, including cell-matrix and cell-cell interaction.
18. Understand the different types of cell-junctions, what proteins are involved in cell-cell junctions and their roles in cell adhesion.
19. Understand the structure and function of the cell cytoskeleton and how it controls the cell division, motility, tension, and differentiation. Students will also learn about important proteins that make up the cell's cytoskeleton and how these proteins signal to control the cytoskeletal functions.
20. Understand the different types of cell signalling including, paracrine, endocrine, autocrine, synaptic, and signalling through cell-cell contact. Students need to provide examples for each type of cell signalling and identify the important molecules that are involved in that process.
21. Define, classify and summarize the history of the histology and embryology sciences,
22. Count histological methods,
23. Classify microscopes and explain their properties,
24. Use and maintain light microscopes,
25. Define the basic concepts of biophysics,

26. Explain the biomechanics concept,
27. Summarize the types, differences, and the properties of the bioelectrical observation instruments,
28. Summarize the use of statistics in medicine,
29. Define the data types and say the appropriate definitive statistic test for the data, and use the proper table and graphics to show the data,
30. Explain the hypothesis tests,
31. State the parametric ve nonparametric tests,
32. Explain the terminology of microbiology and classify microorganisms.

TRANSITIONING TO LIFE AIM AND LEARNING OBJECTIVES

Aim:

At the end of the seven weeks committee, semester I students should be able to explain the concept of the formation of macro-micro-system and the energy mechanisms in biological systems which can define the building blocks of life and their relation. Students should be also able to explain topologically holistic human anatomy, general embryologic and anatomical concepts.

Learning Objectives:

At the end of this committee, students should be able to,

1. Explain the emergence of living elements,
2. Explain the transition stages of inanimate molecules to cells,
3. Count the emergence of the first cell and the family, genus and species of the creature,
4. Explain the day-to-day body system, the organs and the tissues with which the needs arise, from the emergence and development of the human being,
5. Define the concept of nutrition
6. Summarize the digestion and absorption of carbohydrates,
7. Explain the biochemical pathways in carbohydrate metabolism in detail,
8. Explain the enzyme concept,
9. Summarize the hormonal control in the cell,
10. Learn about the different types of genetic abnormalities in terms of mutations and autosomal chromosomal abnormalities.
11. Understand the different abnormalities that might happen in sex chromosomes, how they are diagnosed, and what diseases arise from these genetic abnormalities.
12. Identify different clinical diagnostic methods for diagnosing genetic diseases including: Pre-symptomatic testing, symptomatic testing, carrier genetic screening, and prenatal testing.
13. Understand the genetic basis of cancer and how some mutations can lead to uncontrolled cell division and in turn, change the normal cell into a cancer cell.
14. Identify sex cells and explain gametogenesis,
15. Define the ovulation and explain the formation of the corpus luteum, count their duties and tell the fate,
16. Explain fertilization, blastocyst formation and implantation,
17. Explain the formation of bilaminar and trilaminar discs and the phenomenon of neurulation,
18. Count changes in embryonal and fetal periods,
19. Account for non-embryonic formations,
20. Explain the concepts of human anatomy, the importance of the information used in medical education,
21. Define the macro-micro systems and similarities to each other,
22. Explain the molecular evolution in biophysical perspective,
23. Explain the general anatomical structure of anatomical terms and systems,
24. Explain the energy and thermodynamic concepts in biological systems,
25. Define the basic concepts of molecular biophysics,
26. Define the molecular biophysical methods and explain the usage in medicine,
27. Explain and interpret the test used in biostatistics.

**MUSCLE, SKELETON and NERVOUS SYSTEM-I
AIM AND LEARNING OBJECTIVES**

Aim:

At the end of the eight weeks committee, semester I students should be able to describe the biochemical structure of the musculoskeletal system, express the use of macromolecules such as fat and protein, state how our health is determined by our inherited differences combined with our lifestyles and environment, and describe how combining and analyzing information about our genome with other clinical and diagnostic information. Students should be also able to explain the histological structure of cartilage, bone, skeletal muscle, peripheral nerve and fat, state the anatomical components and biophysical mechanisms of cell and the movement in the vitality process, and describe the activities and structural features of the warning and energy systems necessary for movement.

Learning Objectives:

At the end of the committee, students should be able to,

1. Define the anatomic terms,
2. Explain the upper extremity bones joints and muscles and distinguish the structures,
3. Explain the columna vertebralis, costae and sternum structures and muscles and joints of them,
4. Define protein and lipid digestion,
5. Explain muscle biochemistry,
6. State the structure and metabolism of nucleic acids,
7. Explain calcium and phosphorus metabolism and their functions,
8. Count cartilage types and explain their properties,
9. Describe the histological structure and osteogenesis of bone,
10. Explain histologic fat of skeletal muscle and peripheral nerve fibers,
11. Count fat tissue types and explain their properties,
12. Explain the formation of potentials that are of biological importance,
13. Describe the biophysical properties of the cell membrane,
14. Define passive transitions and ionic balance,
15. Explain resting potential,
16. Describe action potential and ionic balance in excitable cells,
17. Describe voltage-gated ion channels and explain the effects of these channels on action potential,
18. Explain compound action potential and its clinical importance,
19. Describe synaptic transmission,
20. Define the biophysical properties of muscle contraction and explain the clinical importance of electromyography (EMG),
21. Define the biophysical properties of smooth muscle,
22. Understand the concept of personalized medicine based on the inherited genetic information from an individual,
23. Understand the different methods used for the prenatal diagnostics of genetic diseases,
24. Understand the ethical concerns that arise from, genetic testing, genetic engineering, and gene cloning.

1. WEEK				
25.12.2023	Monday			Lecturer
08:30	09:15		FREE STUDY TIME	
09:30	10:15		FREE STUDY TIME	
10:30	11:15		Meeting with the Coordinator	Dr. Nadide ÖZKUL DOĞRU
11:30	12:15	ANA	Bones: General Considerations	Dr. Orhan BEGER
12:15	13:30	TDP100	Theoretical	
13:30	14:15	BFZ	Basic Concepts of Cell Biophysics	Dr. Serkan GÜRGÜL
14:30	15:15	BFZ	Basic Concepts of Cell Biophysics	Dr. Serkan GÜRGÜL
15:30	16:15	BLM	Theoretical	
16:30	17:15	BLM	Theoretical	
26.12.2023	Tuesday			Lecturer
08:30	09:15		FREE STUDY TIME	
09:30	10:15	ANA	Joints: General Considerations	Dr. Erdem GÜMÜŞBURUN
10:30	11:15	ANA	Joints: General Considerations	Dr. Erdem GÜMÜŞBURUN
11:30	12:15	BFZ	Basic Concepts of Cell Biophysics	Dr. Serkan GÜRGÜL
12:15	13:30	TDP100	Practice	
13:30	14:15	BKY	Lipid Chemistry	Dr. Mustafa ÖRKMEZ
14:30	15:15	BKY	Lipid Chemistry	Dr. Mustafa ÖRKMEZ

MUSCLE, SKELETON and NERVOUS SYSTEM-II
AIM and LEARNING OBJECTIVES

Aim:

At the end of the eight weeks committee, semester I students should be able to explain the histological structure of cartilage, bone, skeletal muscle, peripheral nerve and fat, state the anatomical components, physiological mechanisms of movement in the vitality process, and describe the activities and structural features of the warning and energy systems necessary for movement. Students should be also able to define the biochemical structure of the cell membrane and the relationship of the musculoskeletal system with liquid electrolyte and acid base balance and describe the medical usage and the health effects of ionized and non-ionized radiation on living systems.

Learning Objectives:

Students should be able to,

1. Explain the anatomy of lower extremity,
2. Explain the cranial bones, joints and muscles,
3. State the muscles of the back,
4. Discuss the sectional anatomy,
5. Explain membrane structure and transport system,
6. Define extracellular matrix,
7. Explain the biochemistry of body fluids,
8. Explain the fluid electrolyte balance of the body,
9. Identify the acid base balance of the body,
10. Explain the metabolism of neurotransmitters,
11. Explain the body organization,
12. Identify homeostasis,
13. Explain how internal balance is preserved,
14. Explain the fluid balance of the body,
15. Define the structural properties of the cell,
16. Explain the passage of matter through the cell membrane,
17. Define connections between cells,
18. Express the potential of action in muscle and nerve cells,
19. Explain the neurotransmitter and its receptors,
20. Explain the autonomic nervous system,
21. Explain the neuroendocrine control and the second journalists,
22. Explain muscle contraction according to muscle types
23. Define the fundamental concepts of radiation biophysics,
24. Explain electromagnetic fields and its effects on living tissues,
25. Count the types of radiation used in medical applications,
26. Define and explain the techniques used in medical imaging.

1. WEEK				
04.03.2024	Monday			Lecturer
08:30	09:15		FREE STUDY TIME	
09:30	10:15	ANA	Bones of Lower Limb	Dr. Erdem GÜMÜŞBURUN
10:30	11:15	ANA	Bones of Lower Limb	Dr. Erdem GÜMÜŞBURUN
11:30	12:15		Meeting with the Coordinator	Dr. Nadide ÖZKUL DOĞRU
12:15	13:30	TDP100	Theoretical	
13:30	14:15		FREE STUDY TIME	
14:30	15:15		FREE STUDY TIME	
15:30	16:15	BLM	Theoretical

HEMATOPOIETIC SYSTEMS AIM AND LEARNING OBJECTIVES

Aim:

At the end of the seven weeks committee, semester I students should be able to explain the hematopoietic system from a biochemical point of view, explain the general structure of blood and hematopoiesis, realize the structure of the immune system, the organs and cells play role in immunity, natural defense mechanisms and immune response mechanisms, host-microorganism relationships. Students should be also able to define antigen and antibody concepts, blood transfusion and coombs tests.

Learning Objectives:

Students should be able to,

1. Explain psychological development stages and describing learning theories,
2. Assess different psychopathological theories,
3. Accomplish mental state examination with biopsychosocial approach,
4. Explain psychopathology of mental states,
5. Describe psychological development stages of a child and healthy development periods,
6. Describe problems of each development stages,
7. Describe attachment process between parent and infant in early childhood stage and listing possible deviations,
8. Describe blood coagulation and biochemical factors
9. Describe the erythrocyte metabolism,
10. Describe the synthesis and structure of hemoglobin,
11. Expression of porphyrin metabolism,
12. Explain the metabolism of bilirubin,
13. Count the composition of blood,
14. Count and explain blood cells,
15. Interpret blood preparations,
16. Explain blood production,
17. Classify the microorganisms, explain the structure, genetic properties and reproduction of microorganisms,
18. Define the natural defense mechanisms of microorganisms,
19. Say the tissues and organs playing roles in immunity and their functions,
20. Define the sterilization and disinfection,
21. Explain Coombs test and blood transfusion.

1. WEEK

Aims: At the end of this semester, students will be able to relate and explain respiratory and circulation systems, digestion and metabolism, central nervous system, endocrine and urogenital systems respectively. Students will be able to describe the cell functionally and structurally as a complex system and all the organelles that make up the cell. At the same time, they will be able to explain human-environment interaction and list the mechanisms of disease formation.

Learning Objectives:

1. Students will describe the anatomy and functioning of the respiratory and circulatory systems and explain their relationship,
2. Students will explain the anatomy and functioning of the digestive system, describe the healthy functioning of metabolism,
3. Students will explain the control, anatomy and functioning of the central nervous system and endocrine mechanism on the body,
4. Students will be able to explain the anatomy and physiology of the urogenital organs,
5. Students will be able to explain human-environment interaction and relationships,
6. Students will be able to count the formation mechanisms and relations of diseases,
7. Students will be able to list the basic concepts in pharmacology, drug administration routes and action mechanisms of drugs,
8. Students will be able to explain the pharmacokinetic and pharmacodynamic interactions of drugs,
9. Students will be able to explain the factors that change the effect of drugs, the interactions between drugs, the toxic effects of drugs and the importance of pharmacogenetics.

Committee IV	11.03.2024	26.04.2024	26.04.2024
Committee V	29.04.2024	14.06.2024	14.06.2024

Final exam:

Make-up (Second trial) exam:

Public Holidays:

Ramadan Feast Holiday: 10-12 April 2024

23th April National Sovereignty and Children's Day: 23 April 2024

Labor and Solidarity Day: 01 May 2024

**RESPIRATORY AND CIRCULATORY SYSTEMS COMMITTEE
AIM AND LEARNING OBJECTIVES**

Aim: To provide students with normal structure, development, mechanics and functions of respiratory and circulatory systems, etiopathogenesis, symptoms, basic clinical and laboratory findings, diagnostic methods, general characteristics of viruses and bacteria and diseases caused by these agents and diagnosis and treatment approaches of these diseases.

Learning Objectives:

At the end of this committee, second year medical students are expected to be able to;

1. Characterise the anatomic structures of the circulatory system.
2. Describe the embryonic origin and development of the circulatory system.
3. Define the histological structures of the circulatory system.
4. Define the working mechanisms and pathophysiology of the circulatory system.
5. List etiopathogenesis, symptoms and basic clinical, laboratory or histopathological findings.
6. Explain the disease – causing microorganisms and their features.
7. List the symptoms of the diseases that are caused by these agents, basic clinical, histopathological and laboratory findings and methods for diagnosis.
8. Define the anatomical structures of the respiratory system.
9. Define the embryological development of the respiratory system.
10. Define the histological structures of the respiratory system.
11. Define the functional mechanisms of the respiratory system.
12. Explain the anatomical and histological features of the airway organs and structures that play a role in breathing.
13. Define the central and peripheral control mechanisms on respiration.
14. Define the basic concepts and terms related to the structure and function of the lung and count its normal values.
15. Define oxygen and carbon dioxide transport in blood and gas exchange in alveoli.
16. Describe the anatomical structures of the circulatory system.
17. Define embryological origins and development of circulatory system.
18. Define the histological structures of the circulatory system.
19. Define the mechanisms and physiopathology of circulatory system.

**DIGESTIVE AND METABOLISM SYSTEM COMMITTEE
AIM AND LEARNING OBJECTIVES**

Aim: The second committee offers courses governing the fundamental aspects of the natural structure, development and functions of the respiratory system. The students are also expected to learn etiopathogenesis, symptoms, main clinical and laboratory findings and diagnostic procedures concerning the respiratory system's disorders. Additionally, the curriculum aims at equipping students with knowledge about general characteristics of bacteria, diseases that are caused by bacteria and the determinants, diagnostic and therapeutic approaches related to bacterial diseases.

Learning Objectives: At the end of this committee, second year medical students are expected to be able to;

1. Describe the anatomical considerations related to the respiratory system.
2. Define the embryological development of the respiratory system.
3. Define the histological structures of the respiratory system.
4. Explain the functioning mechanisms of the respiratory system.
5. Clarify the functions of the organs and the structures that play a role in breathing on the basis of the histological and anatomic considerations.
6. Identify the central and peripheral control mechanisms that have an effect upon respiration.
7. Describe the fundamental concepts and terms concerning the structures and functions of the lungs and list the normal range of values.
8. Define the transport processes of oxygen and carbon dioxide in the blood and clarify the process of gas exchange.
9. Explain the functions of the basic structures of the blood.
10. Describe the biochemical processes of oxygen and hemoglobin in the blood.
11. Explain how the respiratory movements are organized according to the requirement.
12. Define the manner in which blood gases are transported in the blood and the normal value ranges of the blood gas concentrations.
13. Describe the respiratory volumes and capacities and assess whether they are in normal range.
14. List the etiopathogenesis, symptoms, cardinal clinical, laboratory and histological findings of the respiratory disorders.
15. Explain the disease – causing microorganisms and their features.
16. List the symptoms of the diseases that are caused by these agents, basic clinical, histopathological and laboratory findings and methods for diagnosis.

Ast. Prof. Dr. Saliha Gökçe Alagöz	
Ast. Prof. Dr. Hülya Öztatlıcı	
Ast. Prof. Dr. Büşra Şen Halıcıoğlu	

**NERVOUS SYSTEM COMMITTEE
AIM AND LEARNING OBJECTIVES**

Aim: It is aimed to learn the anatomy, physiology, histology and biochemistry of central nervous system, and also to relate the anatomy to physiology of the system, give information about the general characteristic of microorganisms and the diseases caused by them, diagnosis and treatment of the diseases.

Learning objective: At the end of this committee, second year medical students are expected to be able to;

- 1- identify anatomical structures of nervous system and sensory organs
- 2- identify the embryologic developments of nervous system and sensory organs.
- 3- identify the histologic structures of nervous system and sensory organs
- 4- identify the working mechanisms of nervous system and sensory organs.
- 5- identify the etiopathogenesis of the diseases of sensory organs, the symptoms, and the findings of clinic, laboratory and histopathologic tests.
- 6- explain the features of the causative microorganisms.
- 7- define the symptoms of infection disease caused by these agents, the basic findings of clinic, laboratory and histopathologic tests, and the diagnosis methods.

**ENDOCRINE AND UROGENITAL SYSTEMS COMMITTEE
AIM AND LEARNING OBJECTIVES**

Aim: To find out anatomy, physiology, histology and biochemistry of the endocrine and reproductive systems.

Learning Objectives: At the end of this committee, second year medical students are expected to be able to;

1. Identify anatomical structures of the endocrine system and the reproductive system.
2. Define embryonic development of the endocrine and urogenital systems.
- 3- Define the histological structure of the endocrine system and urogenital system organs.
- 4- Define the mechanisms of endocrine system and urogenital systems' function.
- 5- Recognize the etiology and pathophysiology of diseases related to the urogenital system and pathological changes causing diseases.
- 6- Know the pathogenesis of diseases of the endocrine system, clinical and laboratory symptoms and basic histopathological findings.
- 7-Explain characteristics of disease agent like as protozoa, helminths and arthropods.
8. Explain symptoms of diseases caused by these agents, clinical, laboratory and histopathological main findings and used methods for diagnosis.

**HUMAN & ENVIRONMENTAL INTERACTION and PATHOPHYSIOLOGY OF DISEASE
COMMITTEE**

Aim: Understanding the structure and physiology of the cell and general definitions of embryology, and the effects of environmental and genetic factors on cell, tissue and organ levels. The students who have learned the normal human organism are introduced to the concept of disease before they start to learn the diseases on the basis of systems, the distinction of health and disease concepts, the internal and external factors that disturb the balance of the healthy organism, the pathological and immunological mechanisms of the diseases, the general features of laboratory and clinical diagnostic methods. Students are provided with a knowledge about the basic principles of prevention and treatment necessary to protect health, the pharmacokinetic properties of drugs, general characteristics of fungi, diseases caused by these agents, diagnosis and treatment approaches, basic concepts of environment and environmental health and the importance of environmental health and water in human life, the effects of pollution and wastes on human and environmental health, and the properties of air and noise pollution concepts.

Learning Objectives: At the end of this committee, second year medical students are expected to be able to;

1. Explain the structure and functioning of the cell at molecular level,
2. Explain the development of the baby in the mother's womb,
3. Count the environmental factors that the human body is exposed to
4. Define epigenetic concepts and explain their effects,
5. Express genome analysis and functions,
6. Count genetically transmitted diseases,
7. Explain the temporary and permanent effects of the womb and postpartum environmental factors,
8. List the effects of biological, chemical and physical factors on the system, organ, tissue and cell levels in the human body,
9. Explain the mechanisms by which non-communicable diseases occur
10. explain the relationship between disorders at organ and tissue level in infectious diseases
11. List the consequences and mechanisms that can be caused by physical and chemical trauma.
12. Explain the body's response to all kinds of factors acting at the systems level,
13. Define immunological concepts,
14. Explain the immune mechanisms,
15. Explain biological and psychological foundations of behavioral sciences,
16. Define basic psychopathological concepts,
17. Define and explain the types of cell injury,
18. Count and define adaptation changes,
19. Explain cell aging,
20. Explain the etiology and mechanisms of action of inflammation,
21. List the pathogenesis and events of inflammation,
22. Describe the types and morphology of inflammation,
23. List the conditions and types of healing and the factors affecting them,
24. List the basic concepts in pharmacology, drug delivery routes and mechanisms of action of drugs.
25. Explain pharmacokinetic and pharmacodynamic events of drugs.
26. Explain the factors that change the effect of drugs, the interactions between drugs, toxic effects of drugs and the importance of pharmacogenetics.

27. Explain nucleic acids, structure of DNA, genome organization, DNA synthesis, mutation and repair mechanisms. Define RNA molecule structure, types and functions. Explain gene expression and controlling mechanisms.
28. Define chromosomes, express numerical and structural irregularities and the concept of cytogenetics, comprehend family tree analysis methods and cytogenetic analysis methods used in the diagnosis of genetic features or diseases.
29. Define the concepts of immunology and general immunity, explain the relationship between the immune system and genetics, explain the genetic basis of disorders caused by immune deficiencies and explain the experimental approaches for diagnosis and treatment follow-up.
30. Explain the concept of environment, count the components of the environment, explain the concept of environmental health, list the types of environmental pollution, explain the effects of the environment on human health, adopt the necessity of environmental health services, count the measures to be taken for the environment.
31. Explain the importance of water in human life, discuss the water situation in the world and Turkey, define the clean and healthy water concepts and their features, list legislation on the subject and explain the taking samples and disinfection strategies
32. Explain the concept of waste, list waste management hierarchy, list the basic principles of waste management, explain the legal regulation on the subject, explain the importance of pollution and waste for human and environmental health
33. Define air pollution and its sources, discuss air pollutants and their measurement values, explain the importance of air pollution and global warming for health, and list ways to prevent air pollution.
34. Define noise pollution and noise sources, evaluate the intensity and frequency of sound, explain the importance of noise for health and list the ways to prevent the health effects of noise and noise
35. Explain pathophysiology of shortness of breath, cough, chest pain, palpitation, ventilation-perfusion-diffusion disorders and inflammatory and infectious processes of the respiratory tract
36. Define causes of airway obstruction
37. Explain pathophysiology of swallowing difficulty, painful swallowing, relation of symptoms like dyspepsia, abdominal pain, abdominal distension etc. with diseases, ketoacidosis and dehydration and overhydration
38. Define effects of digestive disorders on metabolism
39. Explain Mechanisms of signs and symptoms of nervous system's diseases and biochemical basis of behaviors and importance of behavioral disorders
40. Define causes and implications of headaches and causes of movement disorders

SEMESTER III AIMS AND LEARNING GOALS

Aims:

Gain basic and up-to-date information about the etiopathogenesis, pharmacology, microbiology, clinical and radiological findings of diseases, obtain information about the main public health problems and practices. Gain basic skills and attitudes required by the profession to prepare for the profession before clinical internships.

Goals:

1. Define the causes of diseases (genetic, developmental, metabolic, toxic, microbiological, autoimmune, neoplastic, degenerative, traumatic, etc.).
2. Categorise and interpreting the clinical, laboratory, radiological and pathological findings of common diseases in the community.
3. Comprehend the mechanisms of injury caused by diseases in cells, tissues and organs, structural changes and the development of diseases over time.
4. Define the effect, action mechanism (pharmacodynamics), side effects, pharmacokinetic properties, drug-drug interactions, indications and contraindications for use of drugs.
5. Comprehend the microbiological factors and disease formation mechanisms of infectious diseases.
6. Define the ethical concepts and principles of the art of medicine and interpreting the ethical problems that may arise.
7. Define health services and problems in Turkey, explaining the application areas and usage areas of epidemiological researches.
8. Learn the chapters that make up a medical article and their purposes

Skills:

1. At the end of “pathology laboratory training”, recognize and show the basic changes caused by diseases at organ, tissue and cell level.
2. Take and process microbiological samples and recognize the microscopic appearances of microorganisms at the end of “Microbiology laboratory training”.
3. At the end of “clinical skills laboratories training”: i) reinforce the clinical skills acquired in previous years; ii) gain the skills of suturing, insert a urinary catheter in men and women, insert nasal packing, breast examination, rectal examination, speculum insertion and gynaecological examination. Gain the ability to take detailed and reliable history. Gain the ability to evaluate the parts of a medical article.
4. At the end of the Basic and Advanced Life Support module, gain the skills of resuscitation, intubation, emergency airway management, and vascular access.
5. At the end of the Communication Module, the Importance of Communication in Medicine, Ethical Values in Medicine (informed consent, keeping secrets), -Inform the patient, give feedback, manage the difficult patient, report bad news, problem-solving, and acquisition of conflict management skills.

Attitude:

Understanding that the primary duty of the physician is to prevent diseases and to protect human life and health by trying to cure diseases. To be aware of the importance of establishing healthy communication with the patient in the success of the treatment. Understand and adopt the power of scientific methods in understanding the causes, mechanism of formation, diagnosis and treatment of diseases. Adopt scientific and ethical values in the practice of the medical profession.

2023–2024 ACADEMIC YEAR ENGLISH MEDICINE
SEMESTER III COMMITTEE I

Committees	Committee begins	Committee ends	Committee Examination
Committee I	25 September 2023	10 November 2023	10 November 2023
Committee II	13 November 2023	22 December 2023	22 December 2023
Committee III	25 December 2023	19 January 2024	19 January 2024
Committee IV	29 January 2024	8 March 2024	8 March 2024
Committee V	11 March 2024	3 May 2024	3 May 2024
Committee VI	6 May 2024	14 June 2024	14 June 2024

Final exam: 03 July 2024

Make-up (Second trial) exam: 17 July 2024

Public Holidays:

Republic Day: 29 October 2023

New year holiday: 01 January 2024

Ramadan feast holiday: 09-12 April 2024

National Sovereignty and Children's Day: 23 April 2024

Labor and Solidarity Day: 01 May 2024

Youth and Sports Day: 19 May 2024

**INFECTIOUS DISEASES AND HEMATOPOIETIC SYSTEM COMMITTEE
AIMAND LEARNING OBJECTIVES**

Aim: Inflammation, basic pathological concepts such as oncogenesis and infectious agents, bacteria, viruses and fungal diseases related to factors such as the formation mechanism, pharmacology for infectious agents are intended to learn by the students in this establishment.

At the end of this committee students will be able to,

- Have knowledge about bacteria, viruses and fungi, understand the mechanisms of pathogenesis,
- Choose evidence-based and high efficient methods in diagnosis of infectious agents,
- Apply basic laboratory tests for the identification of infectious agents,
- Explain antimicrobial drugs and their action mechanisms,
- Describe the changes on tissues and organ systems of infectious agents and genetic diseases.

DISEASES OF RESPIRATORY AND CARDIOVASCULAR SYSTEM COMMITTEE AIM AND LEARNING OBJECTIVES

Aim: The aim of Circulatory and Respiratory Systems course committee aim is to obtain information about pathology of respiratory and circulatory diseases, pathophysiology, clinical findings, basic diagnostic methods and pharmacological treatment in common in children and adults and to teach basic concepts related to diseases of these systems prior clinical internships.

At the end of this committee students will be able to,

- Summarize the anatomy and physiology of the respiratory system
- Understand complaints and physical signs related to circulatory and respiratory diseases
- Explain the pathophysiology and the characteristics of normal and pathological heart sounds in adults and children
- Describe invasive and non-invasive radiological, nuclear medicine diagnostic procedures
- Count pathology and the clinical findings of inflammatory diseases of the upper and lower respiratory tract
- Express the basic risk factors causing respiratory and circulatory system diseases and treatment of them
- Describe how to perform the tracheostomy
- Describe epidemiology, pathophysiology, diagnosis, the clinical course and treatment of acute bronchitis, pneumonia and lower respiratory tract infections
- Count the harm and cessation methods of tobacco products
- Count environmental and occupational lung disease and explain the pathophysiology, diagnosis of interstitial lung disease,
- Explain pathophysiology, diagnosis, clinical course and treatment options of heart failure,
- Have information about the electrocardiogram evaluation
- Describe hypertension epidemiology, diagnosis, complications, treatment options and ways of protection
- Count diagnosis, clinical course, morphological characteristics, treatment, epidemiological characteristics, risk factors and prevention of ischemic heart disease
- Describe pathology, diagnosis, treatment and prophylaxis of the infective endocarditis
- Explain acute rheumatic fever pathology, diagnosis, treatment and prophylaxis
- Count congenital heart disease
- Describe the structures cardiopulmonary resuscitation and practice on the model
- Count heart sounds listening centers and able to describe the characteristics of pathological heart sounds
- Explain mechanism of action, pharmacokinetics, toxic effects, clinical use and drug interactions of the drugs affecting autonomic nervous system
- Explain mechanism of action, pharmacokinetics, toxic effects, the clinical use and drug interactions of drugs used for cardiovascular and respiratory systems.

**DIGESTIVE SYSTEM DISEASES COMMITTEE
AIMAND LEARNING OBJECTIVES**

Aim: The aim of course committee' is to teach common digestive and hematopoietic diseases in children and adults. Students should explain pathophysiology, etiology, clinical signs and symptoms of these diseases. Students could define laboratory methods, radiology and nuclear medicine used in the diagnosis of these diseases and basic drugs used in the treatment.

At the end of this committee students will be able to,

- Count the diseases of these two systems,
- Create the basic theoretical knowledge in practice by using this information for the years ahead;
- Reach right diagnosis by combining theoretical training with bedside training.

ENDOCRINE, REPRODUCTIVE AND URINARY TRACT DISEASES COMMITTEE
AIM AND LEARNING OBJECTIVES

Aim: The aim of this committee is to give information about the physiology and pathology of endocrine organs, reproductive system and urinary system, pathophysiology and management of diseases involving endocrine organs, reproductive system and urinary system.

At the end of this committee students will be able to describe:

- Physiology of the endocrine organs and endocrinologic terms
- Pharmacology of the endocrine system
- Pathology of endocrine organs, reproductive system and urinary system
- Pathophysiology of the diseases involving endocrine organs, reproductive system and urinary system
- Management of diseases involving endocrine organs, reproductive system and urinary system

**NERVOUS SYSTEM, PSYCHIATRY, MOTOR AND SENSORY SYSTEM DISEASES COMMITTEE
AIM AND LEARNING OBJECTIVES**

Aim: The aim of this committee is to give information about etiopathogenesis, pathophysiology and diagnosis of psychiatric and neurologic diseases and management of psychiatric and neurologic diseases.

At the end of this committee students will be able to describe:

- Physiology of neurologic system
- Pathophysiology and etiology of neurologic and psychiatric diseases
- Clinical features of neurologic and psychiatric disorders
- Diagnostic tools in neurologic diseases
- Pharmacology of neurologic and psychiatric disorders
- Management of neurologic and psychiatric diseases

Assoc. Prof. Hamit Sırrı Ketten	
Assoc. Prof. İlkay Doğan	

**THE COMMITTEE OF PUBLIC HEALTH, FAMILY MEDICINE,
BIostatISTICS AND MEDICAL ETHICS
AIM AND LEARNING OBJECTIVES**

Aim: The aim of this study is to give information about basic concepts of public health, common health problems and medical ethics.

At the end of this committee students will be able to describe:

- Basic concepts of public health
- Common health problems
- Preventative measures against common health problems
- Ethical aspects of preventive and curative medicine

FORENSIC MEDICINE INTERNSHIP PROGRAM

Purpose:

After completing the forensic medicine internship, fourth-year students will have a comprehensive understanding of the topics that a general practitioner should be knowledgeable about. They will be able to conduct forensic examinations, prepare forensic reports, and acquire the necessary knowledge in other forensic matters. Additionally, they will establish contact with relevant institutions.

Objectives:

They will know and define what forensic medicine, forensic sciences, and forensic sciences are

1. They will know how to conduct forensic examinations and under what conditions, prepare forensic reports, understand the legal responsibilities of the physician, possess the necessary knowledge and skills in cases of abuse and neglect, and be aware of which institutions to contact in situations where they may not be adequate.
2. They will grasp all the areas of responsibility in forensic medicine
3. Within these areas of responsibility, they will learn to use their knowledge effectively.

SEMESTER 4 FORENSIC MEDICINE INTERNSHIP PROGRAM

Duration of Internship: 2 Weeks

Internship Supervisor: Asst.Prof.Dr. Murat AKBABA

1st Week Monday		Theoretical-Practical	Course Title	Lecturer
08:30	09:15	T	Introduction to Forensic Sciences and Forensic Medicine	Prof.Dr. Aysun BARANSEL ISIR

PEDIATRIC SURGERY INTERNSHIP PROGRAM

Purpose:

At the end of the Pediatric Surgery internship, 4th year students will have a good command of the subjects that a medical school graduate general practitioner should know, will be able to perform life-saving interventions especially in emergency patients when necessary, and will be equipped with the necessary knowledge to diagnose patients in elective cases.

Objective:

1. Learn both anatomical and radiological evaluation of congenital or acquired surgical pathologies of the gastrointestinal and urogenital system in children
2. Know the diagnosis and treatment in case of emergency, learn when to apply in cases where it is not enough,
3. Comprehend the areas of responsibility of pediatric surgery,
4. They will learn both preventive and therapeutic medicine in diseases that fall within these areas of responsibility.

SEMESTER 4 PEDIATRIC SURGERY INTERNSHIP PROGRAM**Internship Duration:** 1 week**Internship Supervisor:** Assoc.Prof.Dr. Hikmet Zeytun

1st Week Monday		Theoretical-Practical	Course Name	Lecturer
08:30	09:15	T	Inguinal Hernia, Hydrocele and Cord Cyst in Children	Prof.Dr. Bulent Hayri Özokutan
09:30	10:15	T	Inguinal Hernia, Hydrocele and Cord Cyst in Children	Prof.Dr. Bulent Hayri Özokutan
10:30	11:15	T	Congenital Diaphragmatic Hernias	Assoc.Prof.Dr. Hikmet Zeytun

PEDIATRICS INTERNSHIP PROGRAM

Purpose:

Child Health and Diseases At the end of the internship, 4th year students gain basic approach and evaluation skills to pediatric patients by mastering the issues that a general practitioner graduated from the Faculty of Medicine should know in the field of "Child Health and Diseases". Gains the knowledge and equipment to make the diagnosis and differential diagnosis of diseases, to treat diseases that can be treated in primary care, to recognize and intervene in cases that require urgent intervention, to make preliminary diagnoses and refer cases that require advanced examination and treatment.

Objective :

1. Able to evaluate symptoms of childhood diseases, take anamnesis and perform physical examination,
2. Be able to distinguish between normal and pathological examination findings in accordance with the age of the child,
3. Be able to request appropriate laboratory and radiological tests used in the diagnosis of childhood diseases and evaluate the results,
4. Be able to make preliminary diagnosis/diagnosis of diseases,
5. Be able to treat and follow up diseases, recognize and treat the complications they cause,
6. Be able to make preliminary diagnoses and refer cases that require further examination and treatment,
7. Be able to explain and apply what "Well Child Monitoring" is,
8. He or she will be able to give information to the family about the diseases and answer the family's questions.

GENERAL SURGERY DEPARTMENT INTERNSHIP PROGRAM

Purpose:

During the internship, to provide the necessary theoretical knowledge about physical examination, diagnosis and treatment stages of surgical patients and how to manage major surgical diseases; It is aimed to provide students with the ability to use this information at the end of the internship, with applications and practices carried out in outpatient clinic, ward and operating room conditions.

Objectives:

1. Will be able to take anamnesis from a general surgery patient. Will be able to perform systemic physical examination, breast examination, head and neck examination and anorectal examination.
2. Students will gain the ability to make diagnosis and differential diagnosis by combining clinical, laboratory and radiological findings.
3. He will be able to make the diagnosis and differential diagnosis of acute abdomen and acute appendicitis, list the surgical indications and direct the patient to the appropriate clinic at the right time.
4. Be able to diagnose and differentiate surgical emergencies such as upper and lower gastrointestinal tract bleeding and intestinal obstruction, and list treatment protocols.
5. Will be able to make shock physiopathology, types, clinic, diagnosis, differential diagnosis and management.
6. Be able to diagnose and treat fluid-electrolyte and acid-base balance disorders.
7. Will be able to perform preoperative patient preparation and postoperative patient follow-up.
8. Will be able to communicate effectively and positively with patients, relatives and healthcare personnel.
9. Becomes skilled in interventions such as dressing, urinary catheter, nasogastric tube insertion, rectal touch, suturing, injection, vascular access, rectal tube, enema, blood collection, colostomy care, etc.

SEMESTER 4 GENERAL SURGERY INTERNSHIP PROGRAM**Internship Duration:** 8 Weeks**Internship Responsible:** Assoc.Prof.Dr. İlyas BAŞKONUS

Week 1 Monday	Theoretical- Practical	Course title	Lecturer
08:00-08.40 09:00-09:45 10:00-10:45 11:00-11:45 12:00-13:20 13:30-14:15 14:30-15:15 15:30-16:15	First Lesson (Turkish-Eng)	Introduction to Internship Course	Head of General Surgery Department

INTERNAL MEDICINE INTERNSHIP PROGRAM

Purpose:

At the end of the Internal Medicine internship, 4th year students; By integrating the knowledge and skills they gained in the preclinical period into clinical disciplines, they gain basic approach and evaluation skills to adult and geriatric patients by mastering the diagnosis and treatment approaches of urgent and common diseases in the field of "Internal Medicine" of a medical school graduate general practitioner. Gains the knowledge and equipment to make the diagnosis and differential diagnosis of diseases, to treat diseases that can be treated in primary care, to recognize and intervene in cases that require urgent intervention, to make preliminary diagnoses and refer cases that require advanced examination and treatment.

Objectives:

1. Able to take detailed history of adult and geriatric age group diseases and evaluate their symptoms,
 2. Able to communicate well with adult and geriatric age group patients and their relatives,
 3. Be able to conduct systematic examination of adult and geriatric age group diseases,
 4. Be able to distinguish normal and pathological examination findings in accordance with adult and geriatric age group diseases,
 5. Be able to request appropriate laboratory and radiological tests used in the diagnosis of adult and geriatric age group diseases and evaluate the results,
 6. Gastroenterology, Nephrology, Hematology, Rheumatology, Endocrine and Metabolic Diseases, Geriatrics and Medical
- By learning diagnostic approaches in oncology diseases, you will be able to make a preliminary diagnosis / diagnosis by making differential diagnoses of common and emergency diseases,
7. Be able to treat and monitor common and urgent diseases, predict and recognize the complications they cause, and treat them,
 8. To be able to make preliminary diagnoses of cases requiring further examination and treatment, and to make an emergency treatment plan if necessary, and to refer them,
 9. Be able to screen for preventable diseases and common cancers in the adult and geriatric age group,
 10. Able to provide information to patients' relatives about diseases and answer their questions,
 11. Will be able to explain the rational drug use approach and ethical responsibility in prescribing.

SEMESTER 4 INTERNAL MEDICINE INTERNSHIP PROGRAM**Internship Duration:** 10 Weeks**Internship Responsible:** Prof.Dr. Özlem USALAN

Week 1 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:20	T	Introduction to Internal Medicine	Prof.Dr. Z. Abidin ÖZTÜRK
09:30	10:20	T	Anamnesis and approach to the patient	Prof.Dr. Z. Abidin ÖZTÜRK
10:30	11:20	T	Biology of Aging	Prof.Dr. Z. Abidin ÖZTÜRK
11:30	12:20		Comprehensive geriatric evaluation	Prof.Dr. Z. Abidin ÖZTÜRK
13:30	14:15	T	Endocrinological Symptomology	Assoc.Prof.Dr. Zeynel Abidin SAYINER
14:25	15:10	T	Interpretation of Endocrinological Laboratory tests	Assoc.Prof.Dr. Zeynel Abidin SAYINER
15:20	16:05	T	Hemogram evaluation	Prof.Dr. Vahap OKAN
16.15	17.00	T	Approach to the Painful Patient in Internal Medicine	Prof.Dr. Mehmet CESUR
Week 1 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:20		Freelancing	
09:30	10:20	T	Behcet's disease	Assoc.Prof.Dr. Orhan ZENGİN
10:30	11:20	T	Skin Examination for Internal Medicine	Prof.Dr. Necmettin KIRTAK
11:30	12:20	T	Approach to the Patient with Fever	Asst.Prof.Dr. Ayşe Özlem METE
13:30	14:15	T	Laboratory in Internal Medicine Practice	Prof.Dr. İclal Geyikli ÇİMENCİ
14:25	15:10	T	Laboratory evaluation in hematology	Prof.Dr. Vahap OKAN
15:20	16:05	T	Cardiovascular system examination approach	Assoc.Prof.Dr. Hamit YILDIZ
16.15	17.00	T	Evaluation of vital signs	Assoc.Prof.Dr. Hamit YILDIZ
Week 1 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:20	P.	Prepedeutic Bedside Training General & Vital Examination	Internal Medicine Lecturer. members
09:30	10:20			
10:30	11:20	P.	Prepedeutic Bedside Training Head & Neck Examination	Internal Medicine Lecturer. members
11:30	12:20			
13:30	14:15	T	abdominal examination	Prof.Dr. Murat Taner GÜLŞEN
14:25	15:10	T	Gastroenterological Symptoms and signs	Prof.Dr. Murat Taner GÜLŞEN
15:20	16:05	T	Acute Renal Failure	Assoc.Prof.Dr. Mehmet Fatih ERDUR
16.15	17.00	T	Nephrological Symptomology	Assoc.Prof.Dr. Mehmet Fatih ERDUR
Week 1 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:20	p	Prepedeutic Bedside Education Heart & Chest Examination	Internal Medicine Lecturer. members
09:30	10:20

OBSTETRICS AND GYNECOLOGY INTERNSHIP PROGRAM

Purpose:

At the end of the Obstetrics and Gynecology internship, 4th year students will have a good command of the subjects that a physician graduated from the faculty of medicine should know, will be able to perform life-saving interventions especially in emergency obstetric and gynecological patients when necessary, and will have the knowledge to lead to diagnosis in elective cases.

Objectives:

1. Will be able to perform routine first-level follow-up of pregnant patients,
2. Will be able to plan diagnosis and treatment in emergencies, explain to whom to apply and refer when necessary,
3. Will be able to take routine smears,
4. Will be able to adopt a preventive medicine approach in diseases related to gynecology, pregnancy and childbirth.

SEMESTER 4 OBSTETRICS AND GYNECOLOGY INTERNSHIP PROGRAM**Internship Duration:** 6 Weeks**Internship Supervisor:** Assoc.Prof.Dr. Neslihan BAYRAMOĞLU TEPE

1st Week Monday		Theoretical-Practical	Course Name	Lecturer
08:30	09:15			
09:30	10:15	T	Recurrent pregnancy losses	Prof.Dr. Mete Gürol Uğur, MD
10:30	11:15	T	Premature rupture of membranes	Assoc.Prof.Dr. Hüseyin Çağlayan ÖZCAN
11:30	12:15	P	Group 1-2-3: Service Group 1-2-3: PolyclinicGroup 1-2-3: Gynecology and Obstetrics Operating Room 1-2	Obstetrics and Gynecology Faculty Members
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Tuesday		Theoretical-Practical	Course Name	Lecturer
08:30	09:15	T	Physiology of Childbirth	Assoc.Prof.Dr. Özge K. Karuserci
09:30	10:15	T	Normal and operative delivery	Assoc.Prof.Dr. Hüseyin Çağlayan ÖZCAN
10:30	11:15	T	Abnormal fetal presentation	Assoc.Prof.Dr. M. Hanifi Bademkiran
11:30	12:15	P	Group 1-2-3: Service Group 1-2-3: PolyclinicGroup 1-2-3: Gynecology and Obstetrics Operating Room 1-2	Obstetrics and Gynecology Faculty Members

CARDIOVASCULAR SURGERY INTERNSHIP PROGRAM

Purposes:

To show the symptoms, signs and physical examinations of adult and congenital heart and peripheral vascular (artery-vein) diseases, to introduce diagnostic methods, to give information about surgical treatment methods.

Objectives:

1. Will be able to approach peripheral vascular disease and examine patients,
2. Know the approach to a patient who has undergone heart surgery and the points to be considered,
3. Will be able to recognize the heart-lung machine,
4. Will be able to manage the patient in emergency vascular traumas.

SEMESTER 4 CARDIOVASCULAR SURGERY INTERNSHIP PROGRAM

Internship Duration: 1 week

Internship Supervisor: Prof.Dr. M. Adnan Celkan

1st Week Monday		Theoretical-Practical	Course Name	Lecturer
08:30	09:15	T/P	Patient Visit	Heart and Vascular Cer. Faculty Members
09:30	10:15	T	Surgical Anatomy of the Heart	Prof.Dr. M. Adnan CELKAN
10:30	11:15	T	Surgical Anatomy of the Heart	Prof.Dr. M. Adnan CELKAN
11:30	12:15	T	Surgical Anatomy of the Heart	Prof.Dr. M. Adnan CELKAN
13:15	14:00	T/P	Polyclinic	
14:15	15:00	T	Peripheral Artery Diseases, Venous System Diseases	Asst.Prof.Dr. Erhan HAFIZ
15:15	16:00	T	Peripheral Artery Diseases, Venous System Diseases	Asst.Prof.Dr. Erhan HAFIZ
16.15	17.00	T/P	Patient Visit	
1st Week Tuesday		Theoretical-Practical	Course Name	Lecturer
08:30	09:15	T/P	Patient Visit	Heart and Vascular Cer. Faculty Members
09:30	10:15	T	Aortic Dissection, Aortic aneurysm, Abdominal aortic aneurysm	Asst.Prof.Dr. Erhan HAFIZ
10:30	11:15	T	Aortic Dissection, Aortic aneurysm, Abdominal aortic aneurysm	Asst.Prof.Dr. Erhan HAFIZ
11:30	12:15	T	Aortic Dissection, Aortic aneurysm, Abdominal aortic aneurysm	Asst.Prof.Dr. Erhan HAFIZ
13:15	14:00	T/P	Polyclinic	Heart and Vascular Cer. Faculty Members
14:15	15:00	T	Congenital Heart Diseases and Surgery	Prof.Dr. M. Adnan CELKAN
15:15	16:00	T	Congenital Heart Diseases and Surgery	Prof.Dr. M. Adnan CELKAN
16.15	17.00	T/P	Patient Visit	Heart and Vascular Cer. Faculty Members
1st Week Wednesday		Theoretical-Practical	Course Name	Lecturer
08:30	09:15	T/P	Patient Visit	Heart and Vascular Cer. Faculty Members
09:30	10:15	T	Valve Diseases	Prof.Dr. M. Adnan CELKAN
10:30	11:15	T	Valve Diseases	Prof.Dr. M. Adnan CELKAN
11:30	12:15	T	Valve Diseases	Prof.Dr. M. Adnan CELKAN

15:15	16:00	T	Heart Tumors	Asst.Prof.Dr. Erhan HAFIZ
16.15	17.00	T/P	Patient Visit	Heart and Vascular Cer. Faculty Members
1st Week Friday		Theoretical-Practical		
08:30	09:15		FINAL EVALUATION EXAM	
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			

CARDIOLOGY INTERNSHIP PROGRAM

Purposes:

In heart diseases, to show cardiac symptoms, signs and cardiac physical examination. To introduce diagnostic methods. To teach the points to be considered during diagnosis and treatment.

Objective:

1. Gain awareness about cardiovascular diseases, which are the most common cause of morbidity and mortality in the world and in Turkey,
2. Be able to recognize and interpret cardiac symptoms, take anamnesis for diagnosis and differential diagnosis,
3. Will be able to distinguish whether the sounds and murmurs heard in cardiac auscultation are physiological or pathological,
4. Will be able to choose the appropriate diagnostic method and guide the patient when necessary,
5. Will be able to take an ECG and read and interpret ECG samples,
6. Will be able to count the risk factors that lead to cardiovascular diseases and the precautions that can be taken for these risk factors, and manage the risk factors,
7. Will be able to approach the patient with chest pain with clinical and diagnostic tests for differential diagnosis, plan the treatment and guide the patient when necessary,
8. Will be able to count the symptoms, signs and diagnostic methods of heart failure. Will be able to list the etiological causes that may cause heart failure and the reasons that should be considered in the differential diagnosis. Will be able to count the drug and non-drug treatment applications for heart failure, count and apply the treatments that can be applied in primary care, and direct the patient to the next step for further examination and treatment when necessary,
9. Will be able to count the definition of hypertension and treatment goals, count the antihypertensive drug groups and contraindications of the drugs, count the lifestyle changes recommended in the treatment of hypertension, treat and follow up hypertension in primary care, direct the patient to the next step by defining resistant hypertension,
10. Will be able to define cardiac arrest, count the causes of cardiac arrest, apply effective cardiopulmonary resuscitation (CPR) method, defibrillator use and CPR and drugs used in advanced life support.

SEMESTER 4 CARDIOLOGY INTERNSHIP PROGRAM**Internship Duration:** 2 Weeks**Internship Supervisor:** Prof.Dr. Murat SUCU

1st Week Monday		Theoretical-Practical	Course Name	Lecturer
08:30	09:15		Cardiology Internship introduction	Prof.Dr. Murat SUCU
09:30	10:15	T	Introduction to ECG	Prof.Dr. Murat SUCU
10:30	11:15	T	Symptoms and Signs in Heart Diseases	Assoc.Prof.Dr. Gökhan ALTUNBAŞ

ANESTHESIOLOGY AND REANIMATION INTERNSHIP PROGRAM

Purpose:

At the end of the Anesthesiology and Reanimation internship, 5th grade students will gain basic knowledge about different anesthesia application methods, acquire theoretical and practical knowledge about patient treatment monitoring in the intensive care unit, ensure and maintain airway patency, perform life-saving interventions in emergency patients, and gain some other manual skills. .

Objectives:

1. To enable them to use the necessary tools and equipment to open the airway and especially to gain independent endotracheal intubation skills.
2. To be able to diagnose cardiac arrest and to gain theoretical and practical knowledge to perform cardiopulmonary resuscitation (CPR) in a patient with cardiac arrest.
3. To teach theoretical and practical information about general, regional and local anesthesia applications.
4. To recognize patients requiring intensive care and to convey information about intensive care treatment and follow-up methods.
5. To have knowledge about the basic approach to patients with acute and chronic pain and to gain treatment and follow-up skills.

SEMESTER 5 ANESTHESIOLOGY AND REANIMATION INTERNSHIP PROGRAM**Duration of Internship: 2 Weeks****Internship Supervisor: Asst.Prof.Dr. Ahmet Şenol UYAR**

NEUROSURGERY INTERNSHIP PROGRAM

Purpose:

The overall goal of this rotation is to provide the student with the opportunity to evaluate a variety of acute and chronic neurosurgical diseases. In this rotation, students will expand their understanding of the basic physiology of the nervous system and explore critical concepts in the pathophysiology of neurosurgical treatment. This internship provides fertile ground for integrating their involvement in patient care and their knowledge of basic neurosciences, disease pathophysiology, and clinical practice. Students in the ward will develop their skills in performing neurological examinations, managing acute neuro-surgical emergencies, and participating in clinical and operating room activities.

Objectives:

Once this rotation is completed, the student should have acquired broad objectives that include:

1. Ability to obtain and report a basic neurological patient history for common neurosurgical conditions and injuries.
2. Ability to perform and report a basic neurological physical examination.
3. To demonstrate the basic science, physiology, pathophysiology, pathology and natural history of common neurosurgical conditions and injuries.
4. Ability to develop a working differential diagnosis for common neurosurgical conditions and injuries and the ability to understand the appropriate timing and use of common diagnostic testing methods to help determine the definitive diagnosis.
5. Must be knowledgeable about available treatment options for common neurosurgical conditions and injuries, whether or not requiring surgery. Students should be able to discuss the relative benefits and limitations of each treatment, as well as any side effects or complications.
6. Knowing possible preventive measures to prevent common neurological conditions and injuries.

DERMATOLOGY INTERNSHIP PROGRAM

Purpose:

At the end of this internship, 5th grade students gain basic approach and evaluation skills to Skin and Venereal diseases.

Objectives:

- 1- Be able to make the etiology, transmission methods, prevention methods, diagnosis and differential diagnosis of skin and venereal diseases,
- 2- Will be able to treat diseases that can be treated in primary care,
- 3- He will be able to recognize cases that require advanced examination and treatment and cases that require urgent intervention, intervene and refer them when necessary.

SEMESTER 5 DERMATOLOGY INTERNSHIP PROGRAM

Duration of Internship: 3 Weeks

Internship Supervisor: Prof.Dr. Necmettin KIRTAK

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	psoriasis	Prof.Dr. Orhan Özgöztaşı
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	viral infections of the skin	Prof.Dr. Necmettin Kirtak
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
1st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Lichen Planus, Pityriasis rosea	Prof.Dr. Orhan Özgöztaşı
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	skin lymphomas	Prof.Dr. Necmettin Kirtak
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
1st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Sexually transmitted diseases	Prof.Dr. Necmettin Kirtak
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	Parasitic diseases of the skin	Prof.Dr. Necmettin Kirtak
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
1st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Cutaneous leishmaniasis	Prof.Dr. Orhan Özgöztaşı
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	erythema nodosum	Prof.Dr. Cenk Akçalı
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00	T	Streptococcal pyodermas	Prof.Dr. H.Serhat İnalöz
1st Week Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Staphylococcal pyodermas	Prof.Dr. H.Serhat İnalöz
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	acne vulgaris	Prof.Dr. Cenk Akçalı
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			

2st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Skin cancers:BCC	Prof.Dr. Orhan Özgöztaşı
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	Endogenous eczemas	Prof.Dr. Necmettin Kırtak
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
2st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Skin cancers: Premalignant lesions and SCC	Prof.Dr. Orhan Özgöztaşı
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	Stevens-Johnson syndrome	Prof.Dr. H.Serhat İnalöz
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
2st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Exogenous eczemas	Prof.Dr. Necmettin Kırtak
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	Cutaneous drug reactions	Prof.Dr. Cenk Akçalı
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
2st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Superficial fungal infections of the skin	Prof.Dr. H.Serhat İnalöz
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	Pemphigus group autoimmune bullous diseases	Prof.Dr. Orhan Özgöztaşı
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00	T	rosacea	Prof.Dr. Cenk Akçalı
2st Week Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Pigmentation disorders	Prof.Dr. Necmettin Kırtak
10:30	11:15	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
11:30	12:15			
13:15	14:00	T	erythema multiforme	Prof.Dr. Cenk Akçalı
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			

3st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Nevus and melanoma	Prof.Dr. Orhan Özgöztaş
10:30	11:15	P/T	outpatient clinic practice	Skin and Venereal Diseases. Faculty Members
11:30	12:15		laboratory application	
13:15	14:00	T	candidiasis	Prof.Dr. H.Serhat İnalöz
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
3st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Pityriasis Versicolor	Prof.Dr.H.Serhat İnalöz
10:30	11:15	P/T	outpatient clinic practice	Skin and Venereal Diseases. Faculty Members
11:30	12:15		laboratory application	
13:15	14:00	T	Pemphigoid group autoimmune bullous diseases	Prof.Dr. Orhan Özgöztaş
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
3st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Urticaria and angioedema	Prof.Dr. Cenk Akçalı
10:30	11:15	P/T	outpatient clinic practice	Skin and Venereal Diseases. Faculty Members
11:30	12:15		laboratory application	
13:15	14:00	T	Toxic Epidermal Necrolysis	Prof.Dr. H.Serhat İnalöz
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
3st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	visit	Skin and Venereal Diseases. Faculty Members
09:30	10:15	T	Cicatricial and non-cicatricial alopecias	Prof.Dr. Cenk Akçalı
10:30	11:15	P/T	outpatient clinic practice	Skin and Venereal Diseases. Faculty Members
11:30	12:15		laboratory application	
13:15	14:00	T	Behcet 's disease	Prof.Dr. Cenk Akçalı
14:15	15:00	P/T	outpatient clinic practice laboratory application	Skin and Venereal Diseases. Faculty Members
15:15	16:00			
16:15	17:00			
3st Week Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15		END OF INTERNSHIP EVALUATION ORAL EXAM	
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00		END OF INTERNSHIP EVALUATION WRITTEN EXAM	
14:15	15:00			
15:15	16:00			
16:15	17:00			

INFECTIOUS DISEASES AND CLINICAL MICROBIOLOGY INTERNSHIP PROGRAM

Purpose:

At the end of the infectious diseases and clinical microbiology internship, 5th grade students gain basic approach and evaluation skills to infectious diseases. Gains the knowledge and equipment to be able to diagnose, diagnose and differentially diagnose these diseases, to be able to treat infectious diseases that can be treated in primary care, to recognize cases that require advanced examination and treatment, cases that require urgent intervention, to intervene and to refer them.

Objectives:

1. Explain the importance of infectious diseases in terms of public health,
2. Will be able to make the differential diagnosis of infectious diseases that are common in our society. Will be able to list the ways of transmission and ways of protection.
3. Will be able to explain the specific signs and symptoms of infectious diseases, take anamnesis, perform physical examination, and evaluate laboratory data used in the diagnosis of infectious diseases. Be able to make preliminary diagnosis/diagnosis of infectious diseases.
4. Will be able to obtain sterile and accurate blood, urine and wound culture from the patient with fever. Be able to explain the importance of taking culture,
5. Will be able to explain the importance of hospital-acquired infections, ways to prevent them, and isolation methods.
6. Will be able to list the principles of correct and appropriate use of antimicrobial drugs,
7. Will be able to recognize a patient with an urgent, life-threatening infection and explain the criteria for prevention, diagnosis, treatment and referral.

SEMESTER 5 INFECTIOUS DISEASES AND CLINICAL MICRO. INTERNSHIP PROGRAM

Duration of Internship: 3 Weeks

Internship Supervisor: Prof.Dr. İlkyay KARAOĞLAN

* Ability to examine and monitor infectious patients in the outpatient clinic and clinic (1), attend rounds (2), monitor LP (3), perform peripheral blood smear (4) and take cultures (5)

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Infected. Hast. and Clinical Quantity. Lecturer members
09:30	10:15			
10:30	11:15	T	hospital infections, Infectious Mononucleosis	Prof.Dr. İlkyay Karaoğlan
11:30	12:15	P.	* Infected. Hast. and Clinical Quantity. Practical Applications (1-5)	Infected. Hast. and Clinical Quantity. Lecturer members
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00

PHYSICAL MEDICINE AND REHABILITATION INTERNSHIP PROGRAM

Purpose :

To define risk groups for musculoskeletal diseases and to adopt appropriate physical examination, diagnosis and treatment approaches in these patients.

Objectives:

1. Be able to define risk groups for musculoskeletal diseases.
2. Able to perform musculoskeletal system examination
3. Able to request appropriate laboratory and radiological examinations in musculoskeletal system diseases
4. Be able to understand physical therapy methods used in regional pain
5. Be able to recommend therapeutic exercises
6. Be able to explain the preventive approach to treatment of regional pain and preventing the progression of the disease.
7. Be able to explain the effects and side effects of drug groups used in musculoskeletal system diseases.
8. Able to prescribe non-steroidal anti-inflammatory drug groups for appropriate patients
9. Able to direct musculoskeletal system patients to the relevant branch at the right time

SEMESTER 5 PHYSICAL MEDICINE AND REHABILITATION INTERNSHIP PROGRAM

Duration of Internship: 2 Weeks

Internship Supervisor: Assoc.Prof.Dr. Ali Aydeniz

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Information about physical therapy and rehabilitation definition, operation, and evaluation	Assoc. Dr. Ali Aydeniz
09:30	10:15	T	Physical Therapy Modalities Electrotherapy	Assoc.Dr. Ali Aydeniz
10:30	11:15	T	Chronic widespread pain and fibromyalgia	Prof.Dr. Ali Gur
11:30	12:15	T	Regional pain myofascial pain	Prof.Dr. Ali Gur
13:15	14:00	T/P	Group 1: Polyclinic, Service, Outpatient Treatment Unit	Physical Medicine and Rehab. faculty members
14:15	15:00			
15:15	16:00			
16.15	17:00			
1st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Diagnosis, Treatment and Rehabilitation in Rheumatoid Arthritis	Assoc.Dr. M. Serdar Akaltun
09:30	10:15	T	Spinal cord injuries and rehabilitation	Prof.Dr. Özlem Altındağ

THORACIC SURGERY INTERNSHIP PROGRAM

Purpose:

At the end of the Thoracic Surgery internship, 5th grade students will master the subjects that a medical school graduate general practitioner should know, will be able to perform life-saving interventions when necessary, especially in emergency patients, and will be equipped with the necessary information to diagnose patients in elective cases.

Objectives:

1. Learn both anatomical and radiological evaluation of the thorax
2. Know the diagnosis and treatment in emergency situations, learn who to contact in case of inadequacy,
3. Understand the areas of responsibility of thoracic surgery,
4. He will learn both preventive and curative medicine in diseases that fall within these areas of responsibility.

SEMESTER 5 THORACIC SURGERY INTERNSHIP PROGRAM**Duration of Internship: 2 Weeks****Internship Supervisor: Prof.Dr. A. Feridun IŞIK**

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Prof.Dr. A. Feridun IŞIK
09:30	10:15	T	Anatomy of the thorax	Prof.Dr. A. Feridun IŞIK
10:30	11:15	T	Anatomy of the thorax	Prof.Dr. A. Feridun IŞIK
11:30	12:15	T	Respiratory Physiology	Prof.Dr. A. Feridun IŞIK
13:15	14:00			
14:15	15:00	T	Benign diseases of the esophagus	Prof.Dr. A. Feridun IŞIK
15:15	16:00	T	esophageal cancer	Prof.Dr. A. Feridun IŞIK
16.15	17.00	P.	Patient Visit	Prof.Dr. A. Feridun IŞIK
1st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Prof.Dr. Maruf ŞANLI
09:30	10:15	T	Suppurative diseases of the lung	Asst.Prof.Dr. Bekir ELMA

PULMONARY DISEASES INTERNSHIP PROGRAM

Purpose :

After explaining the normal clinical and functional characteristics of the respiratory system, clinical, functional and radiological changes in disease states and general principles of treatment are taught.

Objectives:

1. Be able to list the epidemiology, diagnosis, complications and prevention methods of respiratory system diseases,
2. Able to evaluate symptoms of respiratory system diseases and perform physical examination,
3. Be able to distinguish normal and pathological respiratory sounds,
4. Able to request appropriate laboratory and radiological tests regarding respiratory system diseases,
5. They will be able to explain the drug groups used in respiratory system diseases, their mechanisms of action and areas of use.
6. Able to inform the patient about the basic risk factors that cause respiratory system diseases,
7. Be able to list the harms of tobacco products and methods to quit using these products,
8. They will be able to explain the mechanism of action, pharmacokinetics, toxic effects, drug interactions and clinical use of drugs used in respiratory system diseases.

SEMESTER 5 PULMONARY DISEASES INTERNSHIP PROGRAM**Duration of Internship: 3 Weeks****Internship Supervisor: Prof.Dr. Meral UYAR**

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Orientation - Application	Prof.Dr. Meral UYAR
09:30	10:15	P.	Internship promotion and determination of goals	Prof.Dr. Meral UYAR
10:30	11:15	P.	Symptoms in the respiratory system, taking anamnesis	Prof.Dr. Meral UYAR
11:30	12:15	P.	Application (Physical examination)	Chest Disease Lecturer members
13:15	14:00	T	Seminar	Chest Disease Lecturer members
14:15	15:00	T	pneumonia	Prof.Dr. Maḫşuk TAYLAN

OPHTHALMOLOGY INTERNSHIP PROGRAM

Purpose:

To provide ophthalmology knowledge and the ability to use it in the evaluation of patients in eye diseases, in the stages of disease prevention, diagnosis, treatment and follow-up.

Objectives:

- 1.** Must have an idea about common ophthalmological diseases such as conjunctivitis and cataract and be able to recognize them when encountered.
- 2.** Must be aware of diseases that are important and require urgent treatment, such as congenital cataract and retinopathy of prematurity.
- 3.** Must gain the skills to approach a patient presenting with ophthalmological complaints, take anamnesis, perform a physical examination and make a differential diagnosis.
- 4.** Must be able to direct patients to appropriate centers for treatment when faced with a complicated ophthalmological problem.
- 5.** One must be knowledgeable about correctly identifying patients who need to be referred to an ophthalmologist, applying the correct treatment to the remaining patient group, and side effect profiles while doing these applications.

SEMESTER 5 OPHTHALMOLOGY INTERNSHIP PROGRAM**INTERNSHIP PROGRAM****Duration of Internship:** 3 Weeks**Internship Supervisor:** Asist Prof.Dr. Sevim Ayça SEYYAR

1st Week Monday		Theoretical-Practical	Course title	Lecturer

OTOLARYNGOLOGY INTERNSHIP PROGRAM

Purpose: The aim of this internship is for medical students to learn the diagnostic methods of ear, nose and throat and head and neck (ENT) diseases and to gain the skills of performing first aid and making referrals when necessary.

Objectives:

1. Can take appropriate anamnesis from ENT patients and perform ENT examination,
2. Must be able to recognize ENT emergency diseases and list appropriate treatment methods,
3. Will be able to explain advanced diagnosis and treatment methods for ENT diseases and refer patients when necessary.

SEMESTER 5 OTOLARYNGOLOGY INTERNSHIP PROGRAM

Duration of Internship: 3 Weeks

Internship Supervisor: Assoc.Prof.Dr. İsmail AYTAÇ

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Operating Room	Otolaryngology Lecturers
09:30	10:15			
10:30	11:15			
11:30	12:15

NEUROLOGY INTERNSHIP PROGRAM

Purpose: The aim of the neurology internship is to diagnose and treat common neurological diseases at the primary care level; recognize emergency neurological situations and provide first aid; To provide the necessary knowledge, skills and attitudes to make referrals under appropriate conditions.

Objectives:

1. Will be able to take anamnesis from neurological patients.
2. Correlates anamnesis, physical examination and neurological examination findings and makes a preliminary diagnosis.
3. He/she will be able to request appropriate laboratory and radiological tests to support the preliminary diagnosis and make a differential diagnosis.
4. Be able to explain the usage areas of diagnostic tests used in neurology (lumbar puncture, electroencephalography, electromyography, neuroradiological examinations),
5. Be able to explain and apply basic scales used in the diagnosis and monitoring of neurological diseases,
6. Be able to explain the causes of neurological diseases (vascular, traumatic, metabolic, genetic, toxic, infectious, autoimmune, inflammatory, degenerative).
7. Will be able to explain ways to protect against neurological diseases (vascular, traumatic, metabolic, genetic, toxic, infectious, autoimmune, inflammatory, degenerative).
8. Will be able to explain the treatment approaches of neurological diseases (knows the basic emergency approaches, primary prevention, referral, etc.).

SEMESTER 5 NEUROLOGY INTERNSHIP PROGRAM**Duration of Internship: 3 Weeks****Internship Supervisor: Prof.Dr. Sırma GEYİK**

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Introduction of the Internship Program	Department of Neurology Lecturer. members
09:30	10:15	T/P	Service and Intensive Care Patient Visit	Department of Neurology Lecturer. members
10:30	11:15	T	Review of neurological examination	Prof.Dr. Sırma GEYİK

NUCLEAR MEDICINE INTERNSHIP PROGRAM

Purpose:

It is aimed to teach the basic indications and limitations of nuclear medicine methods used in the diagnosis and treatment of diseases.

Objectives:

- 1- At the end of the internship, the student will be able to explain nuclear medicine methods used in the diagnosis and treatment of diseases.
- 2- The student will be able to explain the issues to be considered and their limitations in the selection of scintigraphic methods.
- 3- The student will be able to explain the indications for the use of scintigraphy and PET-CT and the basic indications of nuclear treatment methods.

SEMESTER 5 NUCLEAR MEDICINE INTERNSHIP PROGRAM

Duration of Internship: 1 Week

Internship Supervisor: Prof.Dr. Ertan ŞAHİN

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Concepts of radioactivity and radiation, Biological effects of radiation, Imaging and treatment principles in Nuclear Medicine	Prof.Dr. Y. Zeki ÇELEN
09:30	10:15	T	Diagnosis and treatment of thyroid gland diseases in nuclear medicine	Prof.Dr. Y. Zeki ÇELEN
10:30	11:15	P.	Reporting, Polyclinic	Nuclear Medicine Lecturer. members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Bone mineral density measurement	Prof.Dr. Y. Zeki ÇELEN
09:30	10:15	T	Radionuclide treatments	Prof.Dr. Umut ELBOĞA
10:30	11:15	P.	Reporting, Polyclinic	Nuclear Medicine Lecturer. members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Bone scintigraphy	Prof.Dr. Ertan ŞAHİN
09:30	10:15	T	Scintigraphic examinations of the gastrointestinal system	Asst.Prof.Dr. Ebuzer KALENDER
10:30	11:15	P.	Reporting, Polyclinic	Nuclear Medicine Lecturer. members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Scintigraphic examinations of the central nervous system	Prof.Dr. Ertan ŞAHİN
09:30	10:15	T	Myocardial perfusion scintigraphy, Gated cardiac imaging	Asst.Prof.Dr. Ebuzer KALENDER
10:30	11:15	T	Metabolic imaging with PET	Prof.Dr. Umut ELBOĞA
11:30	12:15	T	Scintigraphic examinations of the genitourinary system	Prof.Dr. Y. Zeki ÇELEN
13:15	14:00	P.	Reporting, Polyclinic	Nuclear Medicine Lecturer. members
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Friday		Theoretical-Practical		
08:30	09:15		INTERNSHIP EVALUATION EXAM	
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			

ORTHOPEDICS AND TRAUMATOLOGY INTERNSHIP PROGRAM

Purpose:

Providing the necessary theoretical and practical information about how the student can recognize the orthopedic and traumatic diseases they encounter when they graduate from the Faculty of Medicine and work in primary health care institutions and make the interventions they can do, and for the interventions they cannot do, ensure the appropriate transfer of the patient to the appropriate center.

Objectives:

- 1- Can perform orthopedic examination,
- 2- Be able to diagnose fractures and dislocations,
- 3- Be able to explain the characteristics of pediatric fractures and the types of fractures specific to children,
- 4- Able to evaluate traumatized patients,
- 5- Able to identify orthopedic diseases and refer them to relevant places when necessary,
- 6- Will be able to perform basic radiological evaluations in orthopedic patients.

SEMESTER 5 ORTHOPEDICS AND TRAUMATOLOGY INTERNSHIP PROGRAM

Duration of Internship: 3 Weeks

Internship Supervisor: Assoc.Prof.Dr. Burçin KARSLI

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Internship Program Introduction	Assoc.Prof.Dr. Sezgin Bahadır Tekin
09:30	10:15	T	Radiological Evaluation	Assoc.Prof.Dr. Sezgin Bahadır Tekin
10:30	11:15	P.	Group 1: Service Group 2: Polyclinic Group 3: Operating Room	Orthopedics and Trav. faculty members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
1st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Hip and Knee Examination	Assoc.Prof.Dr. Burçin KARSLI
09:30	10:15	P.	Plaster Splint Applications	Prof.Dr. Volkan KILINÇOĞLU
10:30	11:15	P.	Group 1: Service Group 2: Polyclinic Group 3: Operating Room	Orthopedics and Trav. faculty members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
1st Week Wednesday		Theoretical-Practical	Course title	Lecturer
07:00	09:00	T	Seminar / Council	Orthopedics and Trav. faculty members
09:30	10:15	P.	Patient Visit	Orthopedics and Trav. faculty members
10:30	11:15	T/P	Hand Examination	Asst.Prof.Dr. Erkan Servet
11:30	12:15	P.	Group 1: Service Group 2: Polyclinic Group 3: Operating Room	Orthopedics and Trav. faculty members
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
1st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Shoulder Examination	Assoc.Prof.Dr. Burçin KARSLI
09:30	10:15	T/P	Ankle and Elbow Examination	Prof.Dr. Orhan BÜYÜKBEBECİ
10:30	11:15	P.	Group 1: Service Group 2: Polyclinic Group 3: Operating Room	Orthopedics and Trav. faculty members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
1st Week Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Developmental Hip Dysplasia	Prof. Dr. Volkan KILINÇOĞLU
09:30	10:15	T	Orthopedic Tumors	Asst.Prof.Dr. Erkan Servet
10:30	11:15	P.	Group 1: Service Group 2: Polyclinic Group 3: Operating Room	Orthopedics and Trav. faculty members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			

2st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Vertebral Traumas	Prof.Dr. Orhan BÜYÜKBEBECİ
09:30	10:15	T	pes equinovarus	Prof.Dr. Volkan KILINÇOĞLU
10:30	11:15	P.	Group 3: Service Group 1: Polyclinic Group 2: Operating Room	Orthopedics and Trav. faculty members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
2st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Acute Hematogenous Osteomyelitis	Prof.Dr. Volkan KILINÇOĞLU
09:30	10:15	T	Chronic Osteomyelitis	Prof.Dr. Volkan KILINÇOĞLU
10:30	11:15	P.	Group 3: Service Group 1: Polyclinic Group 2: Operating Room	Orthopedics and Trav. faculty members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
2st Week Wednesday		Theoretical-Practical	Course title	Lecturer
07:00	09:00	T	Seminar / Council	Orthopedics and Trav. faculty members
09:30	10:15	P.	Patient Visit	Orthopedics and Trav. faculty members

PLASTIC AND RECONSTRUCTIVE. SURGICAL INTERNSHIP PROGRAM

Purpose:

At the end of the Plastic, Reconstructive and Aesthetic Surgery internship, 5th grade students will master the issues that a medical school graduate general practitioner should know, will know the situations that require Emergency Plastic Surgery, and will be able to refer patients when necessary. As for other matters requiring plastic surgery, he/she will be equipped with the necessary information and will contact relevant organizations.

Objectives :

1. At the end of this internship, Term 5 students will be able to understand the subjects within the field of Plastic Surgery.
2. At the end of this internship, it is aimed that Term 5 students will know the stages of wound healing, perform appropriate wound follow-up, and know wound closure techniques.
3. At the end of this internship, Term 5 students will know the etiology, treatment and follow-up process of congenital anomalies such as cleft lip and palate, hand anomalies and urogenital anomalies.
4. At the end of this internship, Term 5 students will be able to recognize suture materials and apply suturing techniques.
5. Will learn to use their knowledge effectively within these areas of responsibility,

SEMESTER 5 PLASTIC AND RECONSTRUCTIVE. SURGICAL INTERNSHIP PROGRAM

Duration of Internship: 1 Week

Internship Supervisor: Assoc.Prof.Dr. Recep ANLATI

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Patient Visit	Plastic and Rec. Lecturer of Surgery members
09:30	10:15	T	Plastic and Recon. Introduction to Surgery, Its Development and History	Assoc.Prof.Dr. Recep ANLATI
10:30	11:15	T	Physical properties of the skin, Incision techniques, Normal Wound Healing, Wound healing disorders, Tendon and Nerve healing, Grafts and their applications (grafts such as skin, bone, muscle, etc.), Classification of flaps and their applications (Skin, Muscle, muscle-bone-skin flaps, free flaps),	Assoc.Prof.Dr. Recep ANLATI
11:30	12:15	T	Embryological development of the face, Cleft palate and lip	Assoc.Prof.Dr. Recep ANLATI
13:15	14:00	T	Benign skin tumors, Hemangiomas, Malignant skin tumors, Malignant melanoma	Assoc.Prof.Dr. Recep ANLATI
14:15	15:00	P.	Group 1: Service Group 2: Polyclinic Group 3: Operating Room	Plastic and Rec. Lecturer of Surgery members
15:15	16:00			
16:15	17:00	T	Patient Visit	Plastic and Rec. Lecturer of Surgery members
1st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Patient Visit	Plastic and Rec. Lecturer of Surgery members
09:30	10:15	T	Maxillofacial traumas-1 (soft tissue traumas), Maxillofacial traumas-2 (facial bone fractures),	Assoc.Prof.Dr. Recep ANLATI
10:30	11:15	T	Thermal injuries and chemical burns,	Assoc.Prof.Dr. Recep ANLATI
11:30	12:15	T	Congenital Anomalies (hand, ear, genitourinary anomalies),	Assoc.Prof.Dr. Recep ANLATI
13:15	14:00	P.	Group 1: Service Group 2: Polyclinic Group 3: Operating Room	Plastic and Rec. Lecturer of Surgery members
14:15	15:00			
15:15	16:00			
16:15	17:00	T	Patient Visit	Plastic and Rec. Lecturer of Surgery members
1st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Patient Visit	Plastic and Rec. Lecturer of Surgery members
09:30	10:15	T	Pressure Sores	Assoc.Prof.Dr. Recep ANLATI
10:30	11:15	T	Postoncological Recon. and Tissue Expansion Application.	Assoc.Prof.Dr. Recep ANLATI
11:30	12:15	T	Temporomandibular Joint Diseases	Assoc.Prof.Dr. Recep ANLATI
13:15	14:00	P.	Group 1: Service Group 2: Polyclinic Group 3: Operating Room	Plastic and Rec. Lecturer of Surgery members
14:15	15:00			
15:15	16:00			
16:15	17:00	T	Patient Visit	Plastic and Rec. Lecturer of Surgery members
1st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Patient Visit	Plastic and Rec. Lecturer of Surgery members
09:30	10:15	T	Suture materials and Suture Techniques	Assoc.Prof.Dr. Recep ANLATI
10:30	11:15	T	Microsurgery Applications	Assoc.Prof.Dr. Recep ANLATI
11:30	12:15	T	Seminar Time	Plastic and Rec. Lecturer of Surgery members
13:15	14:00	T	Cosmetic Surgery	Assoc.Prof.Dr. Recep ANLATI
14:15	15:00	P.	Group 1: Service Group 2: Polyclinic Group 3: Operating Room	Plastic and Rec. Lecturer of Surgery members
15:15	16:00			
16:15	17:00	T	Patient Visit	Plastic and Rec. Lecturer of Surgery members
1st Week Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15		INTERNSHIP EVALUATION EXAM	
09:30	10:15			
10:30	11:15			
11:30	12:15			

PSYCHIATRY INTERNSHIP PROGRAM

Purpose:

At the end of the psychiatry internship, 5th grade students will be able to evaluate people and their diseases within a biopsychosocial whole. They will be able to conduct a psychiatric interview and detect signs and symptoms with a mental status examination. They will be able to master the basic psychiatric concepts, diseases and their treatments that a medical school graduate general practitioner should know, make the necessary interventions in emergency patients, and make basic diagnoses and treat elective cases.

Objectives:

- 1.** Be able to enumerate mental illnesses and their symptoms, and make a differential diagnosis of mental illnesses with conditions related to general medical conditions, medications or substance use,
- 2.** Be able to diagnose basic diseases such as mood disorders, schizophrenia and other psychotic disorders, anxiety disorders and somatoform disorders, initiate treatment, and refer patients in cases where they are not sufficient and hospitalization is necessary,
- 3.** Will be able to explain the use of antidepressants, antipsychotics, benzodiazepines and mood stabilizers used in psychiatry in psychiatric diseases, their side effects and how to cope with these side effects.

SEMESTER 5 PSYCHIATRY INTERNSHIP PROGRAM**Duration of Internship: 3 Weeks****Internship Supervisor: Assoc.Prof.Dr. Gülçin ELBOĞA**

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Psychiatric interview and history taking	Assoc.Prof.Dr. Gülçin ELBOĞA
09:30	10:15		Psychiatric signs and symptoms	
10:30	11:15			
11:30	12:15	P.	Group 1-2-3: Service Group 1-2-3: Polyclinic	Adult Psychiatry and Child and Adolescent Psychiatry Lecturer. members

16:15	17:00			
2st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Psychopharmacology	Assoc.Prof.Dr. Bahadır DEMİR
09:30	10:15			
10:30	11:15	P.	Group 1-2-3: Service Group 1-2-3: Polyclinic	Adult Psychiatry and Child and Adolescent Psychiatry Lecturer. members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
2st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Seminar time	Psychiatry Lecturer. members
09:30	10:15			
10:30	11:15	P.	General Visit	Psychiatry Lecturer. members
11:30	12:15			
13:15	14:00	T	Psychopharmacology	Assoc.Prof.Dr. Bahadır DEMİR
14:15	15:00			
15:15	16:00	P.	Group 1-2-3: Service Group 1-2-3: Polyclinic	Adult Psychiatry and Child and Adolescent Psychiatry Lecturer. members
16:15	17:00			
2st Week Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Somatic symptom disorder (somatization/conversion)	Prof.Dr. Abdurrahman Altındağ
09:30	10:15	T	Eating disorders	Assoc.Prof.Dr. Bahadır DEMİR
10:30	11:15	P.	Group 1-2-3: Service Group 1-2-3: Polyclinic	Adult Psychiatry and Child and Adolescent Psychiatry Lecturer. members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			

3st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	sexual function problems	Prof.Dr. Abdurrahman Altındağ Assoc.Prof.Dr. Gülçin ELBOĞA
09:30	10:15		personality disorders	
10:30	11:15	P.	Group 1-2-3: Service Group 1-2-3: Polyclinic	Adult Psychiatry and Child and Adolescent Psychiatry Lecturer. members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
3st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Sexual Abuse and PTSD	Assoc.Prof.Dr. Mehmet Karadag
09:30	10:15	T	Sleeping disorders	
10:30	11:15	T	Disruptive disorders, impulse control and conduct disorders	
13:15	14:00	P.	Group 1-2-3: Service Group 1-2-3: Polyclinic	
14:15	15:00			
15:15	16:00			
16:15	17:00			
3st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Organic mental disorders	Assoc.Prof.Dr. Gülçin ELBOĞA
09:30	10:15			
10:30	11:15	P.	Group 1-2-3: Service Group 1-2-3: Polyclinic	Adult Psychiatry and Child and Adolescent Psychiatry Lecturer. members
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
3st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Seminar time	Psychiatry Lecturer. members
09:30	10:15			
10:30	11:15	P.	General Visit	Psychiatry Lecturer. members
11:30	12:15			
13:15	14:00	P.	Group 1-2-3: Service Group 1-2-3: Polyclinic	Adult Psychiatry and Child and Adolescent Psychiatrist Lecturer. members
14:15	15:00			
15:15	16:00			
16:15	17:00			
3st Week Friday		Theoretical-Practical		
08:30	09:15		INTERNSHIP EVALUATION EXAM	
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			

RADIATION ONCOLOGY INTERNSHIP PROGRAM

Purpose:

The purpose of the internship is to get to know the discipline of Radiation Oncology, to have information about radiotherapy, one of the main treatment methods in cancer, to provide practice on doctor-patient communication and ethics in cancer patients, and to understand the processes of patient evaluation, treatment planning and treatment delivery in the radiation oncology clinic.

Objectives:

At the end of the internship, the student will have knowledge about patient evaluation and radiotherapy indications in the Radiation Oncology clinic. Will be able to recognize early and late side effects that may develop in radiotherapy patients and have information about their treatment.

SEMESTER 5 RADIATION ONCOLOGY INTERNSHIP PROGRAM**Duration of Internship:** 1 Week**Internship Supervisor:** Assoc.Prof.Dr. İhsan KARSLIOĞLU

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Principles of Radiotherapy	Assoc.Prof.Dr. İhsan KARSLIOĞLU
09:30	10:15	T	Principles of Radiotherapy	Assoc.Prof.Dr. İhsan KARSLIOĞLU
10:30	11:15	P.	CT simulator, Radiotherapy planning, Linear Accelerator Therapy, Polyclinic	Assoc.Prof.Dr. İhsan KARSLIOĞLU
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Radiotherapy planning principles	Assoc.Prof.Dr. İhsan KARSLIOĞLU
09:30	10:15	T	radiobiology	Assoc.Prof.Dr. İhsan KARSLIOĞLU
10:30	11:15	P.	CT simulator, Radiotherapy planning, Linear Accelerator Therapy, Polyclinic	Assoc.Prof.Dr. İhsan KARSLIOĞLU
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Gynecological - Radiotherapy for head and neck tumors	Assoc.Prof.Dr. İhsan KARSLIOĞLU
09:30	10:15	T	Radiotherapy in gastrointestinal-genitourinary-system tumors	Assoc.Prof.Dr. İhsan KARSLIOĞLU
10:30	11:15	P.	CT simulator, Radiotherapy planning, Linear Accelerator Therapy, Polyclinic	Assoc.Prof.Dr. İhsan KARSLIOĞLU
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Radiotherapy in Breast Cancer	Assoc.Prof.Dr. İhsan KARSLIOĞLU
09:30	10:15	T	Radiotherapy in Lung Cancer	Assoc.Prof.Dr. İhsan KARSLIOĞLU
13:15	14:00	P.	CT simulator, Radiotherapy planning, Linear Accelerator Therapy, Polyclinic	Assoc.Prof.Dr. İhsan KARSLIOĞLU
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Friday		Theoretical-Practical		
08:30	09:15		INTERNSHIP EVALUATION EXAM (Oral exam, written exam, case presentation)	
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			

RADIOLOGY INTERNSHIP PROGRAM

Purpose:

The purpose of the internship is to teach which radiological modalities should be used first (radiological algorithm) in order to make a differential diagnosis in common symptoms related to digestion, respiratory, circulation, urinary, locomotor and central nervous system, how to read frequently used conventional radiographs and when to use advanced imaging applications. is intended.

Objectives:

- 1- Be able to explain what radiological imaging modalities are,
- 2- Explain what to consider when choosing imaging methods for diagnosis, the sensitivities and limitations of examination methods,
- 3- Able to read direct graphs,
- 4- Will be able to list the indications for the use of US, CDUS, CT and MR and the basic indications of advanced imaging methods.

SEMESTER 5 RADIOLOGY INTERNSHIP PROGRAM**Duration of Internship: 2 Weeks****Internship Supervisor: Prof.Dr. Ahmet METE**

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	General Principles and Algorithm in Radiology	Assoc.Prof.Dr. M. Sait MENZİLCİOĞLU
09:30	10:15	T	General Principles and Algorithm in Radiology	Assoc.Prof.Dr. M. Sait MENZİLCİOĞLU
10:30	11:15	T	Pediatric Radiology	Prof.Dr. H.Ayhan ÖZKUR
11:30	12:15	T	Pediatric Radiology	Prof.Dr. H.Ayhan ÖZKUR
13:15	14:00	P.	Radiology Practice	Radiology Instructor. members
14:15	15:00	T	Musculoskeletal System Radiology	Assoc.Prof.Dr. M. Hamdi ŞAHAN
15:15	16:00	T	Musculoskeletal System Radiology	Assoc.Prof.Dr. M. Hamdi ŞAHAN
16.15	17.00	P.	Radiology Practice	Radiology Instructor. members
1st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Neuroradiology	Prof.Dr. Ahmet METE
09:30	10:15	T	Neuroradiology	Prof.Dr. Ahmet METE
10:30	11:15	T	Vascular Interventional Radiology	Prof.Dr. A.Selim KERVANCIOĞLU
11:30	12:15	T	Vascular Interventional Radiology	Prof.Dr. A.Selim KERVANCIOĞLU
13:15	14:00	P.	Radiology Practice	Radiology Instructor. members
14:15	15:00	T	Musculoskeletal System Radiology	Assoc.Prof.Dr. M. Hamdi ŞAHAN
15:15	16:00	T	Musculoskeletal System Radiology	Assoc.Prof.Dr. M. Hamdi ŞAHAN
16.15	17.00	P.	Radiology Practice	Radiology Instructor. members
1st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Neuroradiology	Prof.Dr. Ahmet METE
09:30	10:15	T	Neuroradiology	Prof.Dr. Ahmet METE
10:30	11:15	T	Pediatric Radiology	Prof.Dr. H.Ayhan ÖZKUR
11:30	12:15	T	Pediatric Radiology	Prof.Dr. H.Ayhan ÖZKUR
13:15	14:00	P.	Radiology Practice	Radiology Instructor. members
14:15	15:00	T	Emergency Radiological Imaging	Assoc.Prof.Dr. M. Sait MENZİLCİOĞLU
15:15	16:00	T	Emergency Radiological Imaging	Assoc.Prof.Dr. M. Sait MENZİLCİOĞLU
16.15	17.00	P.	Radiology Practice	Radiology Instructor. members
1st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Breast Imaging and Pathologies	Assoc.Prof.Dr. M. Sait MENZİLCİOĞLU
09:30	10:15	T	Breast Imaging and Pathologies	Assoc.Prof.Dr. M. Sait MENZİLCİOĞLU
10:30	11:15	T	Digestive System Radiology	Assoc.Prof.Dr. Feyza GELEBEK
11:30	12:15	T	Digestive System Radiology	Assoc.Prof.Dr. Feyza GELEBEK
13:15	14:00	P.	Radiology Practice	Radiology Instructor. members
14:15	15:00	T	Thorax Radiology	Asst.Prof.Dr. Melih AKŞAMOĞLU
15:15	16:00	T	Thorax Radiology	Asst.Prof.Dr. Melih AKŞAMOĞLU
16.15	17.00	P.	Radiology Practice	Radiology Instructor. members
1st Week Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Radiology Practice	Radiology Instructor. members
09:30	10:15	T	Vascular Interventional Radiology	Prof.Dr. A.Selim KERVANCIOĞLU
10:30	11:15	T	Digestive System Radiology	Assoc.Prof.Dr. Feyza GELEBEK
11:30	12:15	T	Digestive System Radiology	Assoc.Prof.Dr. Feyza GELEBEK
13:15	14:00	P.	Radiology Practice	Radiology Instructor. members
14:15	15:00	T	Radiation Biology and Radiation Protection	Assoc.Prof.Dr. M. Hamdi ŞAHAN
15:15	16:00	P.	Radiology Practice	Radiology Instructor. members
16.15	17.00	P.	Radiology Practice	Radiology Instructor. members

2st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Urinary Radiology	Prof.Dr. H.Ayhan ÖZKUR
09:30	10:15	T	Urinary Radiology	Prof.Dr. H.Ayhan ÖZKUR
10:30	11:15	T	Breast Imaging and Pathologies	Assoc.Prof.Dr. M. Sait MENZİLCIOĞLU
11:30	12:15	P.	Radiology Practice	Radiology Instructor. members
13:15	14:00	T	Thorax Radiology	Asst.Prof.Dr. Melih AKŞAMOĞLU
14:15	15:00	T	Radiological Imaging of the Heart	Prof.Dr. A.Selim KERVANCIOĞLU
15:15	16:00	T	Radiological Imaging of the Heart	Prof.Dr. A.Selim KERVANCIOĞLU
16.15	17.00	P.	Radiology Practice	Radiology Instructor. members
2st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Radiology Practice	Radiology Instructor. members
09:30	10:15	T	Neuroradiology	Prof.Dr. Ahmet METE
10:30	11:15	T	Thorax Radiology	Asst.Prof.Dr. Melih AKŞAMOĞLU
11:30	12:15	T	Thorax Radiology	Asst.Prof.Dr. Melih AKŞAMOĞLU
13:15	14:00	P.	Radiology Practice	Radiology Instructor. members
14:15	15:00	T	Nonvascular Interventional Radiology	Assoc.Prof.Dr. M. Hamdi ŞAHAN
15:15	16:00	T	Nonvascular Interventional Radiology	Assoc.Prof.Dr. M. Hamdi ŞAHAN
16.15	17.00	P.	Radiology Practice	Radiology Instructor. members
2st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Radiological Imaging of Hepatobiliary System and Pancreas	Assoc.Prof.Dr. Feyza GELEBEK
09:30	10:15	T	Radiological Imaging of Hepatobiliary System and Pancreas	Assoc.Prof.Dr. Feyza GELEBEK
10:30	11:15	T	Pediatric Radiology	Prof.Dr. H.Ayhan ÖZKUR
11:30	12:15	P.	Radiology Practice	Radiology Instructor. members
13:15	14:00	P.	Radiology Practice	Radiology Instructor. members
14:15	15:00	T	Neuroradiology	Prof. Dr. Ahmet METE
15:15	16:00	T	Neuroradiology	Prof. Dr. Ahmet METE
16.15	17.00	P.	Radiology Practice	Radiology Instructor. members
2st Week Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Radiology Practice	Radiology Instructor. members
09:30	10:15	T	Vascular Interventional Radiology	Prof.Dr. A.Selim KERVANCIOĞLU
10:30	11:15	T	Vascular Interventional Radiology	Prof.Dr. A.Selim KERVANCIOĞLU
11:30	12:15	T	Radiological Imaging of Hepatobiliary System and Pancreas	Assoc.Prof.Dr. Feyza GELEBEK
13:15	14:00	P.	Radiology Practice	Radiology Instructor. members

UROLOGY INTERNSHIP PROGRAM

Purpose:

To provide urology knowledge and the ability to use it to support clinical and laboratory findings regarding the evaluation of patients in the stages of disease prevention, diagnosis, treatment and follow-up in Genito -Urinary system diseases.

Objectives:

Upon completion of this internship, a semester 5 student will:

1. From the urological patient; can take anamnesis, perform physical examination and make differential diagnosis,
2. When urological surgery encounters a problem, it will be able to direct it to appropriate centers for treatment,^[1]_{SEP}
3. Be able to perform urethral catheterization on urological patients and explain the indications and complications related to urethral catheterization,
4. Be able to explain appropriate imaging methods,
5. Will be able to correctly identify patients who need to be referred to a urologist.

SEMESTER 5-UROLOGY INTERNSHIP PROGRAM**Duration of Internship: 3 Weeks****Internship Supervisor: Asst.Prof.Dr. Muharrem BATURU**

1st Week Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Bedside Visit	Faculty Members of the Department of Urology
09:30	10:15	T	Internship Program Introduction / Seminar Council	Visitor Lecturer
10:30	11:15	T	Bladder Cancer	Prof.Dr. Faruk Yağcı
11:30	12:15	T	Bladder Cancer	Prof.Dr. Faruk Yağcı
13.30	14.30	T	Prostate cancer	Prof.Dr. Sakıp Erturhan
13:15	15:00	P.	Group 1: Service Group 2: Polyclinic Group 3: ESWL-Urodynamics-Andrology Unit	Faculty Members of the Department of Urology
15:15	16:00	P.	Service	Faculty Members of the Department of Urology
16.15	17.00	-	Patient Visit	-
1st Week Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Faculty Members of the Department of Urology
09:30	11:00	P.	Group 1: Outpatient Clinic Group 2: Operating Room 1 Group 3: Operating Room 2	
11:00	12:15	T	Diagnosis and Evaluation of Urinary Incontinence	Prof. Dr. Ömer Bayrak
12:15	13:00	P.	Group 1: Outpatient Clinic Group 2: Operating Room 1 Group 3: Operating Room 2 Advanced Simulation Laboratory	Faculty Members of the Department of Urology
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
1st Week Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Faculty Members of the Department of Urology
09:30	10:15	T	Urinary System Stone Disease	Prof.Dr. İlker Seçkiner
10:30	11:15	T	Ureter and Upper Junction Diseases	Prof.Dr. İlker Seçkiner
11:30	12:15			
13:15	17:00	P.	Group 1: Service Group 2: Polyclinic Group 3: ESWL-Urodynamics-Andrology Unit	Faculty Members of the Department of Urology

Semester 6 Assistant Coordinator: Assoc.Prof.Dr. Mehmet KARADAĞ

EMERGENCY MEDICINE INTERNSHIP PROGRAM

Purpose:

At the end of the Emergency Medicine internship, 6th grade students will be able to apply the knowledge, skills and attitudes they have gained during the pre-clinical and clinical training periods of medical education in emergency healthcare service delivery areas. In addition, a medical school graduate will have knowledge of the issues that a general practitioner needs to know, will be able to perform life-saving interventions when necessary, especially in emergency patients, and will be equipped with the necessary information in diagnosing patients in elective cases. Students will fulfill the duties and responsibilities defined for the internship period in line with the working principles, under the supervision of the responsible faculty member/ s in their field in the emergency department where emergency health services are provided .

Objective:

Takes anamnesis from emergency patients . He performs a physical examination. Determines pathological symptoms and findings based on anamnesis and physical examination results, creates preliminary diagnoses and requests basic diagnostic tests. Interprets basic biochemical, hematological and urine examination results. It makes a differential diagnosis by evaluating anamnesis , physical examination findings and the results of basic diagnostic tests together and determines the further examinations necessary to make a definitive diagnosis. Knows the multidisciplinary approach in the diagnosis and treatment of internal and surgical diseases and requests the necessary consultations. Organizes patients' medical records (patient files, epicrisis, etc.). It informs individuals and society about common diseases in society (cardiovascular, diabetes , hypertension, kidney diseases, infectious diseases, senile diseases, malignancies and recommended screening tests), risk factors and their prevention. Works effectively as a team with physicians and other healthcare personnel. Communicates effectively verbally with the patient, patient relatives and other healthcare personnel. Performs diagnostic and interventional applications (IV and IM injection, venous and arterial blood sampling, vascular access, nasogastric and urinary catheter insertion, urine blood and throat culture taking, catheter care and dressing). Closely monitors and evaluates the condition (vital and clinical signs, laboratory results) of critically ill patients . Recognizes internal and surgical emergency clinical conditions, monitors clinical and laboratory findings, and takes the necessary emergency intervention. Plans the patient's treatment and prepares the appropriate prescription. Acts in accordance with medical ethical principles in relations with patients and their relatives. Works with physicians and other healthcare personnel in accordance with ethical rules. Knows the current healthcare system and legislation and acts in accordance with the legislation. Can write reports by evaluating forensic cases.

SEMESTER 6 EMERGENCY MEDICINE INTERNSHIP PROGRAM**Internship Duration:** 8 Weeks**Internship Responsible :** Prof.Dr. Şevki Hakan EREN

Week 1 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Emergency Department Group 2: Emergency Triage	Emergency Medicine Instructor . members

FAMILY MEDICINE INTERNSHIP PROGRAM

Purpose: The aim of the Family Medicine practice course is for intern physicians; To establish the requirements of the medical profession in terms of attitude and behavior, to understand the basic features of primary care medicine, to increase their ability to use their medical knowledge to practice medicine, and to ensure their self-confidence.

Objective: At the end of the "family medicine" internship, term VI students;

- Understand the basic features of primary health care
- Understand national policies and legislation regarding primary healthcare services
- Understand the scope and duties of the family health center
- Understanding the task distribution and workflow in the family health center
- Mastering the principles of health counseling
- Mastering the national vaccination program
- Working within the healthcare team and mastering the job descriptions of the positions
- To be able to examine applying individuals and patients from their biopsychosocial aspects
- Having the ability and knowledge to follow up individuals and patients of all ages
- To be able to integrate preventive medicine practices with treatment and rehabilitative practices
- Ability to establish effective patient-physician communication that will form the basis for clinical decision-making
- Being able to prepare prescriptions focused on rational drug use
- Keeping records and storing data in appropriate environments
- Ability to evaluate vaccination status and determine vaccination needs for the Family Health Unit
- Participating in vaccination applications carried out in Family Health Centers
- Being able to provide consultancy and follow-up as a practitioner in Primary Step preventive health services (immunization, periodic health examination, baby and child monitoring, pregnant and puerperal monitoring, follow-up and consultancy on family planning).
- Conducting medical diagnostic interviews and communicating effectively with patients and their relatives
- Gaining the ability to scan the literature, criticize and comment on the Primary Health Care system.
- Recognizing the need for continuing education and making an effort to meet it
- To provide open and unlimited health services to those who want to receive service
- Respecting personal rights and decisions
- To undertake health consultancy for people and to guide them in making effective use of health resources.
- Being an advocate for patients in the Healthcare system
- Understand the importance of leading the healthcare team in the regular functioning of the Family Health Center.

SEMESTER 6 FAMILY MEDICINE INTERNSHIP PROGRAM

Internship Duration: 2 Weeks

Internship Responsible: Assoc.Prof.Dr. Hamit Sırrı KETEN

Week 1 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Family Medicine Definition and Principles	Assoc.Prof.Dr. Hamit Sırrı KETEN
09:30	10:15		Family Medicine Definition and Principles	
10:30	11:15		Family Medicine in the World	
11:30	12:15		Family Medicine in Turkey	
13:15	14:00		Family-Centered and Patient-Centered Case Report	
14:15	15:00		Primary Health Care	
15:15	16:00		Doctor-Patient Relations	
16:15	17:00		Interviewing the Difficult Patient	
Week 1 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Records in Family Medicine	Assoc.Prof.Dr. Hatice Tuba AKBAYRAM
09:30	10:15		Primary Care Approach to URTI and LRTI	
10:30	11:15		Continuous Maintenance-Comprehensive Maintenance	
11:30	12:15		Problem Solving in the Clinic	
13:15	14:00		Primary Care Approach to Obesity	
14:15	15:00		Referrals and Consultations in Family Medicine	
15:15	16:00		First Step Approach to Thyroid Diseases	
16:15	17:00		Follow-up of Growth and Development in Children	
Week 1 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Nicotine Addiction and Treatment	Assoc.Prof.Dr. Hamit Sırrı KETEN
09:30	10:15		Preconceptional Care	
10:30	11:15		Antenatal Care	
11:30	12:15		Primary Care Approach to Hypertension	
13:15	14:00		Primary Care Approach to Diabetes Mellitus	
14:15	15:00		Home Care Services	
15:15	16:00		Approach to the Dying Patient	
16:15	17:00		Periodic Health Examination	
Week 1 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Informed Consent	Assoc.Prof.Dr. Hatice Tuba AKBAYRAM
09:30	10:15		Low Prevalence Medicine	
10:30	11:15		Primary Care Approach to Anemia	
11:30	12:15		Primary Management of Coronary Artery Disease	
13:15	14:00		Fundamentals of Patient Education and Communication	
14:15	15:00		Versatile Geriatric Assessment	
15:15	16:00		Primary Care Approach to Dementia	
16:15	17:00		First-Line Approach to Depression	
Week 1 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	1. Rational Use of Antibiotics in Primary Care	Assoc.Prof.Dr. Hamit Sırrı KETEN
09:30	10:15	T	Primary Care Approach to the Menopausal Patient	
10:30	11:15	T	Primary Care Approach to the Osteoporosis Patient	
11:30	12:15	P	Patient communication techniques and interviewing difficult patients	
13:15	14:00	P	Patient communication techniques and interviewing difficult patients	
14:15	15:00	P	Patient communication techniques and interviewing difficult patients	
15:15	16:00	P	Patient communication techniques and interviewing difficult patients	
16:15	17:00	P	Taking family history	

Week 2 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P	Taking family history	Assoc.Prof.Dr. Hatice Tuba AKBAYRAM
09:30	10:15		Creating a family genogram	
10:30	11:15		Creating a family genogram	
11:30	12:15		Physical Examination	
13:15	14:00		Physical Examination	
14:15	15:00		Physical Examination	
15:15	16:00		Physical Examination	
16.15	17.00			
Week 2 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P	Assessing family dynamics	Assoc.Prof.Dr. Hamit Sırrı KETEN
09:30	10:15		Assessing family dynamics	
10:30	11:15		Problem based recording	
11:30	12:15		Problem based recording	
13:15	14:00		Chronic patient management in primary care	
14:15	15:00		Chronic patient management in primary care	
15:15	16:00		Chronic patient management in primary care	
16.15	17.00		Chronic patient management in primary care	
Week 2 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P	Problem solving in the clinic	Assoc.Prof.Dr. Hatice Tuba AKBAYRAM
09:30	10:15		Problem solving in the clinic	
10:30	11:15		Requesting and interpreting laboratory tests in primary care	
11:30	12:15		Requesting and interpreting laboratory tests in primary care	
13:15	14:00		Patient-centered case report	
14:15	15:00		Patient-centered case report	
15:15	16:00		Family Health Centers Field Study	
16.15	17.00		Family Health Centers Field Study	
Week 2 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P	Family Health Centers Field Study	Assoc.Prof.Dr. Hamit Sırrı KETEN
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
Week 2 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P	Family Health Centers Field Study	Assoc.Prof.Dr. Hatice Tuba AKBAYRAM
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			

PEDIATRICS INTERNSHIP PROGRAM

Purpose:

At the end of the Child Health and Diseases internship, it is aimed that the student will learn the types of diseases, the correct treatment and approach. For this reason, emphasis is placed on practical courses rather than theory. At the end of the internship, their practical proficiency will increase and their command of the practical approach to diseases will increase.

SEMESTER 6 PEDIATRICS INTERNSHIP PROGRAM

Internship Duration: 8 Weeks

Internship Responsible : Prof.Dr. Metin KILINÇ

Week 1 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Pediatrics Emergency Group 2: Pediatrics Service and Polyclinic	Child Health and Disease . Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30		Article Time	Child Health and Disease . Lecturer . members
14:15	15:00	T/P	Group 1: Pediatrics Emergency Group 2: Pediatrics Service and Polyclinic	Child Health and Disease . Lecturer . members
15:15	16:00			
16.15	17.00			
Week 1 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Pediatrics Emergency Group 2: Pediatrics Service and Polyclinic	Child Health and Disease . Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30	T	Case Presentation / Seminar Time / Mortality Time	Child Health and Disease . Lecturer . members
14:15	15:00	T/P	Group 1: Pediatrics Emergency Group 2: Pediatrics Service and Polyclinic	Child Health and Disease . Lecturer . members
15:15	16:00			
16.15	17.00			
Week 1 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Pediatrics Emergency Group 2: Pediatrics Service and Polyclinic	Child Health and Disease . Lecturer . members

GENERAL SURGERY DEPARTMENT INTERNSHIP PROGRAM

Purpose:

There are no theoretical, practical courses or exams in the intern internship. It is aimed to carry out clinical practices in the field of general surgery at the general practitioner level. During their education, students apply the basic knowledge and skills they have acquired in the field of general surgery in operating room, ward and outpatient clinic conditions.

Objectives:

1. Students review basic knowledge and skills in the field of general surgery.
2. They practice within the scope of general surgery practices in general practice under the supervision of faculty members.

SEMESTER 6 GENERAL SURGERY INTERNSHIP PROGRAM**Internship Duration: 2 Weeks General Surgery + 6 Weeks Gynecology and Obstetrics****Internship Responsible: Assoc.Prof.Dr. İlyas BAŞKONUS**

Week 1 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Operating Rooms Group 3: Polyclinics Group 4: Intensive Care	Faculty Members of the Department of General Surgery
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
Week 1 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Case and Seminar Time	Faculty Members of the Department of General Surgery
09:30	10:15	T/P	Group 1: Service Group 2: Operating Rooms Group 3: Polyclinics Group 4: Intensive Care	Faculty Members of the Department of General Surgery

16.15	17.00			

PUBLIC HEALTH INTERNSHIP PROGRAM

Purposes:

Semester 6 students, medicine; Adopting the view that it is a profession to provide equal, protective, healing and health-promoting services to everyone; To be able to evaluate biological, spiritual, social and cultural reasons that negatively affect health; examining the individual (healthy or sick) together with his/her environment; To reveal health questions and solutions using epidemiological methods and to gain knowledge and skills about the duties of the physician, especially in the management of primary health care services.

Objectives:

- Ability to identify biological and social determinants of health and disease in society
- Adopting that health services should be provided to the whole society, not just to patients or those applying to health institutions
- Ability to enumerate the principles of organization in health services and define the organization model in our country.
- Ability to explain the relationship between primary, secondary and tertiary health services
- Ability to enumerate the duties, authorities and responsibilities of primary care personnel
- Ability to define, calculate and interpret basic indicators showing the health level of the society
- Explain the effects of environmental factors on health and evaluate protection and control measures
- Ability to plan, implement and evaluate the results of prevention and control measures related to infectious diseases, especially immunization services.
- Ability to apply reproductive health, family planning services and consultancy services
- Ability to explain the structure and functioning of the community health center
- Ability to search and present literature on a scientific subject
- Gaining the ability to use epidemiological data in the health decision-making process

SEMESTER 6 PUBLIC HEALTH INTERNSHIP PROGRAM**Internship Duration: 4 Weeks****Internship Responsible: Assoc.Prof.Dr. Neriman AYDIN**

Week 1 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Internship Introduction	Public Health Lecturer. members
09:30	10:15	P.	Group 1: Şahinbey ASM Group 2: Şahinbey District Health Directorate	Public Health Lecturer. members

INTERNAL MEDICINE DEPARTMENT INTERNSHIP PROGRAM

Purpose:

At the end of the internal medicine internship, the aim is for the student to learn the types of diseases, the correct treatment and approach. For this reason, emphasis is placed on practical courses rather than theory. At the end of the internship, their practical proficiency will increase and their command of the practical approach to diseases will increase.

SEMESTER 6 INTERNAL MEDICINE INTERNSHIP PROGRAM

Internship Duration: 8 Weeks

Internship Responsible : Prof.Dr. Özlem USALAN

Week 1 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16:15	17:00			
Week 1 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16:15	17:00			
Week 1 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16:15	17:00			
Week 1 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16:15	17:00			
Week 1 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16:15	17:00			

Week 2 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			
Week 2 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			
Week 2 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			
Week 2 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			
Week 2 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			

Week 3 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			
Week 3 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			
Week 3 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			
Week 3 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			
Week 3 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			

Week 4 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30			
14:15	15:00	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
15:15	16:00			
16.15	17.00			
Week 4 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Polyclinic Group 2: Service	Internal Medicine Lecturer . members
09:30	10:15			
10:30	11:15			
11:30	12:15			
12:45	13:30

16:15	17:00			

OBSTETRICS AND GYNECOLOGY INTERNSHIP PROGRAM

Purpose:

At the end of the Gynecology and Obstetrics internship, 6th grade students will master the subjects that a medical school graduate physician should know, will be able to perform life-saving interventions, especially in emergency obstetric and gynecological patients, when necessary, and will have the knowledge to lead to diagnosis in elective cases.

Objective:

1. Be able to perform routine first-level follow-ups of pregnant patients,
2. Be able to plan diagnosis and treatment in emergency situations, explain who to contact and refer when necessary,
3. Will be able to take routine smears,
4. Will be able to adopt a preventive medicine approach in diseases related to gynecology, pregnancy and birth.

SEMESTER 6 OBSTETRICS AND GYNECOLOGY INTERNSHIP PROGRAM

Internship Duration: 6 Weeks in Obstetrics and Gynecology + 2 Weeks in General Surgery

Internship Responsible: Prof.Dr. Mete Gürol UĞUR

Week 1 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
Week 1 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
Week 1 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15	T	Seminar Time	
11:30	12:15			
13:15	14:00	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	
14:15	15:00			
15:15	16:00			
16.15	17.00			
Week 1 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			
Week 1 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00			

Week 2 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
Week 2 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
Week 2 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15	T	Seminar Time	
11:30	12:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
Week 2 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
Week 2 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 1: Service Group 2: Polyclinic Group 3: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			

Week 3 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 3: Service Group 1: Polyclinic Group 2: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
Week 3 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 3: Service Group 1: Polyclinic Group 2: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
Week 3 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 3: Service Group 1: Polyclinic Group 2: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15	T	Seminar Time	
11:30	12:15	T/P	Group 3: Service Group 1: Polyclinic Group 2: Gynecology and Obstetrics Operating Room 1-2	
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
Week 3 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 3: Service Group 1: Polyclinic Group 2: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15			
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16:15	17:00			
Week 3 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T/P	Group 3: Service Group 1: Polyclinic Group 2: Gynecology and Obstetrics Operating Room 1-2	Gynecology and Obstetrics Faculty Members
09:30	10:15

14:15	15:00			
15:15	16:00			
16:15	17:00			

CARDIOLOGY INTERNSHIP PROGRAM

Purpose:

At the end of the cardiology internship, the aim is for the student to learn the types of diseases, the correct treatment and approach. For this reason, emphasis is placed on practical courses rather than theory. At the end of the internship, their practical proficiency will increase and their command of the practical approach to diseases will increase.

SEMESTER 6 CARDIOLOGY INTERNSHIP PROGRAM

Internship Duration: 6 Weeks Public Health + 2 Weeks Cardiology

Internship Supervisor: Prof.Dr. M. Murat SUCU

Week 1 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Cardiology Instructor . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00	P.	Patient Visit	Cardiology Instructor . members
16.15	17.00	P.	Patient Visit	Cardiology Instructor . members
Week 1 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Cardiology Instructor . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00	P.	Patient Visit	Cardiology Instructor . members
16.15	17.00	P.	Patient Visit	Cardiology Instructor . members
Week 1 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Cardiology Instructor . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00	P.	Patient Visit	Cardiology Instructor . members
16.15	17.00	P.	Patient Visit	Cardiology Instructor . members
Week 1 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Cardiology Instructor . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15	T	Seminar	Cardiology Interns
13:15	14:00	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
14:15	15:00			
15:15	16:00			
16.15	17.00	P.	Patient Visit	Cardiology Instructor . members
Week 1 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Public Health Discussion Hour	Public Health Lecturer . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00	P.	Patient Visit	Cardiology Instructor . members
16.15	17.00	P.	Patient Visit	Cardiology Instructor . members

Week 2 Monday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Cardiology Instructor . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00	P.	Patient Visit	Cardiology Instructor . members
Week 2 Tuesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Cardiology Instructor . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00	P.	Patient Visit	Cardiology Instructor . members
Week 2 Wednesday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Cardiology Instructor . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15			
13:15	14:00			
14:15	15:00			
15:15	16:00			
16.15	17.00	P.	Patient Visit	Cardiology Instructor . members
Week 2 Thursday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	P.	Patient Visit	Cardiology Instructor . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15	T	Seminar	Cardiology Interns
13:15	14:00	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
14:15	15:00			
15:15	16:00			
16.15	17.00	P.	Patient Visit	Cardiology Instructor . members
Week 2 Friday		Theoretical-Practical	Course title	Lecturer
08:30	09:15	T	Public Health Discussion Hour	Public Health Lecturer . members
09:30	10:15	P.	Group: Intensive Care, Service, Polyclinic, Echocardiography, Exercise- Holter	Cardiology Instructor . members
10:30	11:15			
11:30	12:15			
13:15	14:00
